### **General Description**

#### Description

LTI460AL04 is a color active matrix liquid crystal display (LCD) that uses amorphous silicon TFT(Thin Film Transistor) as switching components. This model is composed of a TFT LCD panel, a driver circuit and a LED backlight unit. The resolution of a 46.0" is 1366 x 768 and this model can display up to 16.7 million colors with wide viewing angle of 89° or higher in all directions. This panel is intended to support applications to provide a excellent performance for Flat Panel Display such as Home-alone Multimedia TFT-LCD TV, Display terminals for AV application products, and Digital Information Display (DID).

#### Features

- RoHS compliance (Pb-free)
- High contrast ratio, High luminance
- SPVA(Super Patterned Vertical Align) mode
- Wide viewing angle (±178°)
- High speed response
- Super narrow bezel, Black top chassis
- Landscape / Portrait type compatible
- WXGA (1366 x 768 pixels) resolution (16:9)
- Low power consumption
- Direct Type 2100 LEDs(light emitting diode)
- DE(Data Enable) mode
- LVDS (Low Voltage Differential Signaling) interface (1pixel/clock)

## **General Information**

## 1. Absolute Maximum Ratings

If the condition exceeds maximum ratings, it can cause malfunction or unrecoverable damage to the device.

Item	ltem		bol	Min.	Max.	Unit	Note
Power Suppl	Power Supply Voltage		D	GND-0.5	13.2	V	(1)
Storage terr	Storage temperature		ſG	-20	60	Ĵ	(2)
Glass surface	Center	T <sub>CEN</sub>	TER	0	50	Ĵ	
temperature (Operation)	T. Uniformity		Т	-	10	Ĉ	(2),(5)
Sheek ( pop	oporating )	6	x,y	-	TBD	G	(2)
Shock ( non - operating )		S <sub>nop</sub>	z	-	TBD	G	(3)
Vibration ( non	- operating)	V <sub>n</sub>	ор	-	TBD	G	(4)

Note (1) Ta= 25  $\pm$  2 °C

- (2) Temperature and relative humidity range are shown in the figure below.
  - a. 90 % RH Max. (Ta  $\leq$  39 °C)
  - b. Relative Humidity is 90% or less. (Ta > 39 °C)
  - c. No condensation
- (3) 11ms, sine wave, one time for  $\pm X$ ,  $\pm Y$ ,  $\pm Z$  axis
- (4) 10-300 Hz, Sweep rate 10min, 30min for X,Y,Z axis

riangle T should be less than 10  $C ( riangle T = |T_{CENTER} - T_{CORNER}|)$ 

 $T_{CENTER}$ : Temperature of the center of the glass surface (Test point 5)  $T_{CORNER}$ : Temperature of each edge of the glass surface (Test point 1~4)

## 2. Application information for DID (Digital Information Display)

A long-term display like DID application may cause uneven display including image retention. To optimize module's lifetime and function, several operating usages are required.

1. Normal operating condition

- Temperature: 20 ± 15℃
- Humidity: 65  $\pm$  20 %
- Display pattern: moving picture or regular switchover display

Note) Long-term static information image may cause uneven display.

- 2. Operating usages under abnormal operating condition. Note (1)
- a. Ambient condition
- Well-ventilated place is recommended to set up DID system.
- b. Power off and screen saver
- Periodical power-off or screen saver is needed after long-term static display. Note (2)
- 3. Operating usages to protect uneven display due to long-term static information display
  - a. Suitable operating time for E-DID : under 20 hours a day.
  - b. Periodical display contents change from static image to moving picture.
  - Liquid crystal refresh time is required.
  - c. Periodical background color and character (image) color change
  - Use different colors for background and character (image), respectively.
  - Change colors periodically.
  - d. Avoid combination of background and character with large different luminance.

Note (1) Abnormal condition means every operating condition except normal operating condition. Note (2) Moving picture or black pattern is strongly recommended for screen saver.

4. Lifetime in this spec is guaranteed only when DID is used under right operating usages.

Angle	Mar	θυ	C/R≥10	75	89	-	Degree	SR-3
	Ver.	θ <sub>D</sub>		75	89	-		
Brightness U (9 Poin		B <sub>uni</sub>		-	-	15	%	(4) SR-3

(Ta = 25  $\pm$  2°C, VDD = 12V, fv = 60Hz, f<sub>DCLK</sub> = 80MHz, I<sub>L</sub> = 6.0mArms)

Note (1) Test Equipment Setup

The measurement should be executed in a stable, windless and dark room between 40min and 60min after lighting the back light at the given temperature for stabilization of the back light. This should be measured in the center of screen.

Single lamp current : 380.0mA Environment condition : Ta =  $25 \pm 2$  °C

Main Frequency		f <sub>DCLK</sub>	65	80	85	MHz	
Rush Curr	ent	I <sub>RUSH</sub>	-	-	6	A	(4)

Note (1) The ripple voltage should be controlled under 10% of  $V_{\text{DD}}$ .

- (2)  $f_V = 60Hz$ , fDCLK = 80MHz,  $V_{DD} = 12.0V$ , DC Current.
- (3) Power dissipation check pattern (LCD Module only)
- a) Black Pattern b) White Pattern

c) N-Pattern

(4) Measurement Conditions

### 4.2 Back Light Unit

The back light unit contains 2100 direct-lighting type LEDs (light emitting diode). The characteristics of lamps are shown in the following tables.

Ta=25  $\pm$  2°C

Item	Symbol	Min.	Тур.	Max.	Unit	Note
Lamp Current	Ι <sub>L</sub>	40	380	420	mArms	
Lamp Voltage	VL	-	75	-	Vrms	
Operating Life Time	Hr	50.000	-	-	Hour	(1)

Note (1) It is defined as the time to take until the brightness reduces to 50% of its original value. [Operating condition : Ta =  $25\pm2$ °C, I<sub>L</sub> = 5.5 mArms, For single lamp only.]

Items	Symbol	Conditions	Sp	pecificatio	ns	Unit	Note	
items	Symbol	Conditions	Min.	Тур.	Max.	Onit	NOLE	
Input Voltage	Vin	-	22	24	26	V	<b>Ta=25</b> ±2 °C	
Input Current	lin	Vin = 24.0V Vdim = 3.3V	-	-	11	A	After 1 hour	
Lamp Current	I <sub>O,MAX</sub>	Vdim = 3.3V	-	380	420	mArms	Warm-up	
Frequency	F <sub>LAMP</sub>	Vin = 24.0V	-	-	-	kHz		
Backlight	ON	Vin = 24.0V	2.4	-	5.25	V		
On/Off	OFF	Vin = 24.0V	0	-	0.8	v		
Dimming	V	Max Lum	3.3	-	-	V		
Control	V <sub>DIM</sub>	Min. Lum	-	-	0	V		

## 4.3 Inverter Input Condition & Specification

Note (1) Power Consumption is measured at 1000[cd/m2] of luminance condition which is the typical luminance value. Lamp Current is measured at the point before Lamp.

# 5.5 Input Signals, Basic Display Colors and Gray Scale of Each Color

# 6. Interface Timing

#### 6.1 Timing Parameters (DE only mode)

Signal	Item	Symbol	Min.	Тур.	Max.	Unit	Note
Clock		1/T <sub>c</sub>	65	80	85	MHz	-
Hsync	Frequency	F <sub>H</sub>	43	50	53	KHz	-
Vsync		$F_{V}$	-	60	-	Hz	-
Vertical	Active Display Period	T <sub>VD</sub>	-	768	-	Lines	-
Display Term	Vertical Total	Τ <sub>ν</sub>	773	838	1500	Lines	-
Horizontal	Active Display Period	T <sub>HD</sub>	-	1366	-	Clocks	-
Display Term	Horizontal Total	Т <sub>н</sub>	1568	1600	2000	Clocks	-

Note) This product is DE only mode. The input of Hsync & Vsync signal does not have an effect on normal operation.

Test Point : TTL control signal and CLK at LVDS Tx input terminal in system

MODEL	LTI460AL04	Doc. No	05-000-G-081118	Page	18 / 27

#### 6.3 Power ON/OFF Sequence

To prevent a latch-up or DC operation of the LCD Module, the power on/off sequence should be as the diagram below.

## 8.2 Packing Specification

		ltem	Spec	ification	Remark		
	LCD	Packing		(Packing- et Box)	<ol> <li>1. 150Kg / LCD (10ea)</li> <li>2. 10 Kg / Cushion-pallet (2ea)</li> <li>3. 8 Kg / Packing-Pallet Box (1e</li> <li>4. Cushion-pallet Material : EPS</li> <li>5. Packing-Pallet Box Material :</li> </ol>		
	F	Pallet	1Box	: / Pallet	1. Pallet weight = 8.8kg		
	Packin	g Direction	Ve	ertical			
	Total F	Pallet Size	НхV	x height	1270mm(H) x 1150mm(V) x 844	lmm(heigh	t)
	Total Pa	allet Weight	17	6.8kg	Pallet(8.8kg) + Module(150 kg) + Pallet-BOX(8kg)	+ Cushion(	10kg)

## 9. MARKING & OTHERS

A nameplate bearing followed by is affixed to a shipped product at the specified location on each product.

#### **10. General Precautions**

#### 10.1 Handling

- (a) When the Module is assembled, it should be attached to the system firmly using all mounting holes. Be careful not to twist and bend the Module.
- (b) Because the inverter use high voltage, it should be disconnected from power before it is assembled or disassembled.
- (c) Refrain from strong mechanical shock and / or any force to the Module. In addition to damage, this may cause improper operation or damage to the Module and CCFT back light.
- (d) Note that polarizers are very fragile and could be damage easily. Do not press or scratch the surface harder than a HB pencil lead.
- (e) Wipe off water droplets or oil immediately. If you leave the droplets for a long time, staining or discoloration may occur.
- (f) If the surface of the polarizer is dirty, clean it using absorbent cotton or soft cloth.
- (g) Desirable cleaners are water, IPA(Isopropyl Alcohol) or Hexane. Do not use Ketone type materials(ex. Acetone), Ethyl alcohol, Toluene, Ethyl acid or Methyl chloride. It might permanent damage to the polarizer due to chemical reaction.
- (h) If the liquid crystal material leaks from the panel, it should be kept away from the eyes or mouth . In case of contact with hands, legs or clothes, it must be washed away with soap thoroughly.
- (i) Protect the Module from static, or the CMOS Gate Array IC would be damaged.
- (j) Use finger-stalls with soft gloves in order to keep display clean during the incoming inspection and assembly process.
- (k) Do not disassemble the Module.
- (I) Do not pull or fold the lamp wire.
- (m) Do not adjust the variable resistor located on the Module.
- (n) Protection film for polarizer on the Module should be slowly peeled off just before use so that the electrostatic charge can be minimized.

(o) Pins of I/F connector should not be touched directly with bare hands.

MODEL	LTI460AL04	Doc. No	05-000-G-081118	Page	25 / 27
-------	------------	---------	-----------------	------	---------

#### 10.2 Storage

- (a) Do not leave the Module in high temperature, and high humidity for a long time. It is highly recommended to store the Module with temperature from 0 to  $35^{\circ}$ C and relative humidity of less than 70%.
- (b) Do not store the TFT-LCD Module in direct sunlight.
- (c) The Module should be stored in a dark place. It is prohibited to apply sunlight or fluorescent light in storing.

#### 10.3 Operation

- (a) Do not connect or disconnect the Module in the "Power On" condition.
- (b) Power supply should always be turned on/off by the "Power on/off sequence"
- (c) Module has high frequency circuits. Sufficient suppression to the electromagnetic interference should be done by system manufacturers.
   Grounding and shielding methods may be important to minimize the interference.
- (d) The cable between the back light connector and its inverter power supply should be connected directly with a minimized length. A longer cable between the back light and the inverter may cause lower luminance of lamp and may require higher startup voltage(Vs).
- 10.4 Operation Condition Guide
  - (a) The LCD product should be operated under normal conditions. Normal condition is defined as below;
    - Temperature : 20±15℃
    - Humidity : 55±20%
    - Display pattern : continually changing pattern (Not stationary)
  - (b) If the product will be used in extreme conditions such as high temperature, humidity, display patterns or operation time etc.., It is strongly recommended to contact SEC for Application engineering advice. Otherwise, its reliability and function may not be guaranteed. Extreme conditions are commonly found at Airports, Transit Stations, Banks, Stock market, and Controlling systems.

MODEL	LTI460AL04	Doc. No	05-000-G-081118	Page	26 / 27
-------	------------	---------	-----------------	------	---------

#### 10.5 Others

- (a) Ultra-violet ray filter is necessary for outdoor operation.
- (b) Module should be turned clockwise (regular front view perspective) when used in portrait mode
- (c) Avoid condensation of water. It may result in improper operation or disconnection of electrode.
- (d) Do not exceed the absolute maximum rating value. ( supply voltage variation, input voltage variation, variation in part contents and environmental temperature, and so on)

Otherwise the Module may be damaged.

- (e) If the Module keeps displaying the same pattern for a long period of time, the image may be "sticked" to the screen. To avoid image sticking, it is recommended to use a screen saver.
- (f) This Module has its circuitry PCB's on the rear side and should be handled carefully in order not to be stressed.
- (g) Please contact SEC in advance when you display the same pattern for a long time.
