DESCRIPTION

The LTP-747/757 series are 0.7 inch (17.2 mm) matrix height 5 x 7 dot matrix displays.

The red series devices utilize LED chips which are made from GaAsP on a GaAs substrate. The bright red and green series devices utilize LED chips which are made from GaP on a transparent GaP substrate. The yellow, orange and high-efficiency red series utilize LED chips which are made from GaAsP on a transparent GaP substrate. The red, green, yellow and orange displays have gray face and white dot color. The bright red and high efficiency red displays have red face and red dot color.
