DESCRIPTION

The LTP-537/587 series are 0.5 inch (12.7mm) height 16-segment single digit alphanumeric displays.

The red, bright red, green and orange displays have black face and white segment colors. The high efficiency red display has red face and red segment colors.

The LTP-3784/3785 series are 0.54 inch (13.8mm) height 14-segment dual digit alphanumeric displays.

The dual digit displays have gray face and white segment color.

The red series devices utilize LED chips which are made from GaAsP on a GaAs substrate. The bright red and green series devices utilize LED chips which are made from GaP on a transparent GaP substrate. The yellow, orange and high efficiency red series devices utilize LED chips which are made from GaAsP on a transparent GaP substrate.
