А	PCN change dice - update Vf spec.	Norah	8/9/2021

1. Description

Through hole white LEDs are offered in a variety of packages such as 3mm, 4mm, 5mm, rectangular and cylinder which are suitable for all applications requiring status indication. Several intensity and viewing angle choices are available in each package for design flexibility.

1.1. Features

- Lead (Pb) free product RoHS compliant
- Low power consumption & High efficiency.
- Versatile mounting on p.c. board or panel.
- I.C. compatible/low current requirement.
- Popular T-1 diameter InGaN White & Water Clear lens

1.2. Applications

- Computer
- Communication
- Consumer
- Home appliance
- Industrial

2. Outline Dimensions

Notes:

- 1. All dimensions are in millimeters (inches).
- 2. Tolerance is ±0.25mm (.010") unless otherwise noted.
- 3. Protruded resin under flange is 1.0mm (.04") max.
- 4. Lead spacing is measured where the leads emerge from the package.
- 5. Specifications are subject to change without notice.

3. Absolute Maximum Ratings at TA=25°C

Parameter	Maximum Rating	Unit		
Power Dissipation	90	mW		
Peak Forward Current				
(Duty Cycle≦1/10, Pulse Width≦10ms)	100	mA		
DC Forward Current	25	mA		
Derating Linear From 30°C	0.36	mA/°C		
Electrostatic Discharge	1000V	1000V		
Operating Temperature Range	-40℃ to + 85%	0		
Storage Temperature Range	-40℃ to + 100	c		
Lead Soldering Temperature				
[2.0mm (.079") From Body]	260℃ for 5 Second	260℃ for 5 Seconds Max.		

4. Electrical / Optical Characteristics at TA=25°C

Parameter	Symbol	Min.	Тур.	Max.	Unit	Test Condition
Luminous Intensity	IV	2500	4700	7200	mcd	IF = 20mA Note 1,3,4
Viewing Angle	201/2	-	45	-	deg	Note 2 (Fig.6)
	х	-	0.29	-	nm	IF = 20mA, Note 5
Chromaticity Coordinates	у	-	0.28	-	nm	Hue Spec. Table & Chromaticity Diagram
Forward Voltage	VF	2.7	3.1	3.5	V	IF = 20mA
Reverse Current	IR	-	-	10	μA	VR = 5V
Zener Reverse Voltages	VZ	11	15	20	V	IZ = 10mA

NOTE:

- 1. Luminous intensity is measured with a light sensor and filter combination that approximates the CIE eye-response curve.
- 2. θ 1/2 is the off-axis angle at which the luminous intensity is half the axial luminous intensity.
- 3. Iv classification code is marked on each packing bag.
- 4. The Iv guarantee must be included with ±15% testing tolerance.
- 5. The chromaticity coordinates (x, y) is derived from the 1931 CIE chromaticity diagram..
- 6. Reverse voltage (VR) condition is applied for IR test only. The device is not designed for reverse operation.

5. Typical Electrical / Optical Characteristics Curves

(25°C Ambient Temperature Unless Otherwise Noted)

Fig.1 Relative Intensity VS. Wavelength

Fig.5 Relative Luminous Intensity VS. Ambient Temperature

Fig.2 Forward Current
Derating Curve

Fig.4 Relative Luminous Intensity vs. Forward Current

Fig.6 Spatial Distribution

6. Taping Features

- * Compatible with radial lead automatic insertion equipment.
- * Most radial lead plastic lead lamps available packaged in tape and folding.
- * 5mm (0.197") formed lead spacing available.
- * Folding packaging simplifies handling and testing.
- * Reel packaging is available by removing suffix "A" on option.
- * Ammo packing series lamp type 24 LED+GAP.

Package Dimensions

		Specification			
ltem	Symbol	Minimum		Maximum	
		mm	inch	mm	inch
Tape Feed Hole Diameter	D	3.8	0.149	4.2	0.165
Component Lead Pitch	F	2.3	0.091	3.0	0.118
Front to Rear Deflection	ΔH			2.0	0.078
Feed Hole to Bottom of Component	H1	20.0	0.787	21.0	0.827
Feed Hole to Overall Component Height	H2	25.1	0.988	26.7	1.051
Lead Length After Component Height	L	V	/0	11.0	0.433
Feed Hole Pitch	Р	12.4	0.488	13.0	0.511
Lead Location	P1	4.4	0.173	5.80	0.228
Center of Component Location	P2	5.05	0.198	7.65	0.301
Total Tape Thickness	Т			0.90	0.035
Feed Hole Location	W0	8.5	0.334	9.75	0.384
Adhesive Tape Position	W2	0	0	3.0	0.118
Tape Width	W3	17.5	0.689	19.0	0.748

Part No. : LTW-17KCV4Z-032A BNS-OD-FC002/A4

7. Packing Spec.

Total 3,000 pcs per inner carton

10 Inner cartons per outer carton

Total 30,000 pcs per outer carton

In every shipping lot, only the last pack will be non-full packing

8. Bin Table Specification

Luminous Intensity Iv (mcd) IF@20mA						
Bin Code Min. Max.						
Т	2500	3200				
U	3200	4200				
V	4200	5500				
W	5500	7200				

Note: Tolerance of each bin limit is ±15%

Forward Voltage VF (V) IF@20mA					
Bin Code	Max.				
1E	2.7	2.9			
2E	2.9	3.1			
3E	3.1	3.3			
4E	3.3	3.5			

Note: Forward Voltage Measurement allowance is ±0.1V

Hue Ranks	Chromaticity Coordinates CC(x, y) IF@20mA				
U31	Х	0.267	0.286	0.292	0.274
UST	у	0.262	0.244	0.256	0.276
U32	Х	0.274	0.292	0.297	0.281
032	у	0.276	0.256	0.267	0.289
U41	х	0.281	0.297	0.303	0.289
041	у	0.289	0.267	0.278	0.303
U42	х	0.289	0.303	0.309	0.297
042	у	0.303	0.278	0.289	0.316

Note: Color Coordinates Measurement allowance is ±0.01

C.I.E. 1931 Chromaticity Diagram

9. CAUTIONS

9.1. Application

This LED lamp is good for application of indoor and outdoor sign, also ordinary electronic equipment.

9.2. Storage

The storage ambient for the LEDs should not exceed 30°C temperature or 70% relative humidity. It is re-commended that LEDs out of their original packaging are used within three months. For extended storage out of their original packaging, it is recommended that the LEDs be stored in a sealed container with appropriate desiccant or in desiccators with nitrogen ambient.

9.3. Cleaning

Use alcohol-based cleaning solvents such as isopropyl alcohol to clean the LEDs if necessary.

9.4. Lead Forming & Assembly

During lead forming, the leads should be bent at a point at least 3mm from the base of LED lens. Do not use the base of the lead frame as a fulcrum during forming. Lead forming must be done before soldering, at normal temperature. During assembly on PCB, use minimum clinch force possible to avoid excessive mechanical stress.

9.5. Soldering

When soldering, leave a minimum of 2mm clearance from the base of the lens to the soldering point. Dipping the lens into the solder must be avoided. Do not apply any external stress to the lead frame during soldering while the LED is at high temperature.

Recommended soldering conditions:

	Soldering iron	Wave soldering		
Temperature Soldering time Position	350℃ Max. 3 seconds Max. (one time only) No closer than 2mm from the base of the epoxy bulb	Pre-heat Pre-heat time Solder wave Soldering time Dipping Position	100℃ Max. 60 seconds Max. 260℃ Max. 5 seconds Max. No lower than 2mm from the base of the epoxy bulb	

Note: Excessive soldering temperature and/or time might result in deformation of the LED lens or catastrophic failure of the LED. IR reflow is not suitable process for through hole type LED lamp product.

9.6. Drive Method

An LED is a current-operated device. In order to ensure intensity uniformity on multiple LEDs connected in parallel in an application, it is recommended that a current limiting resistor be incorporated in the drive circuit, in series with each LED as shown in Circuit A below.

Circuit model (A)

Circuit model (B)

- (A) Recommended circuit
- (B) The brightness of each LED might appear different due to the differences in the I-V characteristics of those LEDs.

9.7. ESD (Electrostatic Discharge)

Static Electricity or power surge will damage the LED.

Suggestions to prevent ESD damage:

- Use a conductive wrist band or anti- electrostatic glove when handling these LEDs
- All devices, equipment, and machinery must be properly grounded
- Work tables, storage racks, etc. should be properly grounded
- Use ion blower to neutralize the static charge which might have built up on surface of the LEDs plastic lens as a result of friction between LEDs during storage and handing

Suggested checking list:

Training and Certification

- 9.7.1.1. Everyone working in a static-safe area is ESD-certified?
- 9.7.1.2. Training records kept and re-certification dates monitored?

Static-Safe Workstation & Work Areas

- 9.7.2.1. Static-safe workstation or work-areas have ESD signs?
- 9.7.2.2. All surfaces and objects at all static-safe workstation and within 1 ft measure less than 100V?
- 9.7.2.3. All ionizer activated, positioned towards the units?
- 9.7.2.4. Each work surface mats grounding is good?

Personnel Grounding

- 9.7.3.1. Every person (including visitors) handling ESD sensitive (ESDS) items wear wrist strap, heel strap or conductive shoes with conductive flooring?
- 9.7.3.1. If conductive footwear used, conductive flooring also present where operator stand or walk?
- 9.7.3.2. Garments, hairs or anything closer than 1 ft to ESD items measure less than 100V*?
- 9.7.3.3. Every wrist strap or heel strap/conductive shoes checked daily and result recorded for all DLs?
- 9.7.3.4. All wrist strap or heel strap checkers calibration up to date?

Note: *50V for Blue LED.

Device Handling

- 9.7.4.1. Every ESDS items identified by EIA-471 labels on item or packaging?
- 9.7.4.2. All ESDS items completely inside properly closed static-shielding containers when not at static-safe workstation?
- 9.7.4.3. No static charge generators (e.g. plastics) inside shielding containers with ESDS items?
- 9.7.4.4. All flexible conductive and dissipative package materials inspected before reuse or recycle?

Others

- 9.7.5.1. Audit result reported to entity ESD control coordinator?
- 9.7.5.2. Corrective action from previous audits completed?
- 9.7.5.3. Are audit records complete and on file?

Part No. : LTW-17KCV4Z-032 BNS-OD-FC002/A4

10. Reliability Test

Classification	Test Item	Test Condition	Sample Size	Reference Standard
	Operation Life	Ta = Under Room Temperature IF = Per Data Sheet Maximum Rating Test Time= 1000hrs	22 PCS (CL=90%; LTPD=10%)	MIL-STD-750D:1026 (1995) MIL-STD-883G:1005 (2006)

11. Others

White LED is materialized by combining blue LED and phosphors. Color of White LED is changed a little by an operating current.

The appearance and specifications of the product may be modified for improvement, without prior notice.
