**OPERATION**

M78206N has two control types: panel keypad and infrared remote control.

Start-up by SP key enable the fan controller.

1. Function turn off (OFF key)
2. Start-up function and wind speed select (SP key)
3. Timer setting (TM key)

**OFF KEY**

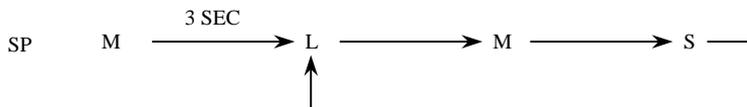

When fan controller is on, press the OFF key on panel or remote control handset, fan functions will be turned off except light output.

**SP KEY**

Start-up SP key

When fan controller is off, press SP key on panel or remote control handset, fan is turned on, initial state is LOW wind; when memory function is available, the wind grade will operate as last state. Both conditions have three seconds starting wind.

Press the SP key again, the wind will be changed as follows:

**TM KEY**

Mode is accumulation:

0.5, 1, 2, 4 hours four steps accumulation.

**MEMORY FUNCITON**

If last state is sleep mode, press SP or ON/OFF key enable fan controller

While memory functions ( SPEED ) will be returned to the last state before sleep mode operation.
