

HMIC™ Integrated Passive Diplexer GSM/DCS or AMPS/PCS Applications 3 mm square MLP Plastic Package

MA4DP918-1277

Features

- HMIC™ Integrated Passive Circuit
- Low Insertion Loss, High Rejection Diplexer
- Surface Mountable in Microwave Circuits, No Wirebonds Required
- Rugged HMIC™ Construction with Polyamide Encapsulation
- Reliable, Multilayer Metalization
- No External 50 Ω Matching Required
- Low Cost Miniature Plastic MLP Package

3mm MLP Plastic Package

Description

The MA4DP918-1277 HMIC™ Integrated Passive Diplexer is fabricated with the patented Heterolithic Microwave Integrated Circuit (HMIC) process. HMIC circuits consist of multilayer conductors on a glass dielectric, which acts as the low dispersion, low loss microstrip transmission medium. The glass allows HMIC devices to have excellent Q characteristics in a low profile, reliable device. Conductors are printed with state-of-the-art semiconductor photolithography processes and encapsulated in rugged silicon nitride and BCB polyamide. The circuit is composed of plated inductors and metal-insulator-metal (MIM) capacitors employing a silicon nitride dielectric layer. The high performance 3 mm MLP package allows for surface mount placement with no additional circuit matching required.

Applications

The MA4DP918-1277 HMIC™ Integrated Passive Diplexer is recommended for use in wireless dual band GSM/DCS or AMPS/PCS applications. The diplexer has low insertion loss in the pass bands and high rejection in the stop bands. All ports are matched to 50 ohms.

PIN Configuration

PIN	Function	PIN	Function
1	GND	9	NC
2	NC	10	RF 1800
3	RF 900	11	NC
4	NC	12	GND
5	NC	13	NC
6	NC	14	ANT
7	NC	15	NC
8	NC	16	NC
Paddle		GND	

Absolute Maximum Ratings¹

@ TA = +25 °C
(Unless otherwise specified)

Parameter	Value
Operating Temperature	-65 °C to +125 °C
Storage Temperature	-65 °C to +150 °C
RF C.W. Incident Power	3 Watts C.W.

1. Exceeding any of these values may result in permanent damage
