Noise suppression filter
For LED lights, DC power supply for home appliances (Radiated noise suppression)
MAF series

RoHS | REACH SVHC-Free | Halogen Free | Lead Free

MAF2520A type

Product Portal | Search | Simulation Model | Selection Guide | Tech Library | Tech Note

FEATURES

- This product is designed to reduce low-frequency (20 to 100 MHz) radiation noise for LED lighting and home appliances.
- It is smaller than the winding type and has the same noise suppression effect.
- Contributes to meeting CISPR standards with LED lighting and home appliances.
- Operating temperature range: –40 to +125°C (including self-temperature rise)

APPLICATION

- LED lighting equipment
- Home appliances (refrigerators, air conditioners, washing machines, vacuum cleaners)

PART NUMBER CONSTRUCTION

MAF	2520	A	SS	600	C	T	000
Series name	L×W×T dimensions 2.5×2.0×0.85 mm	Characteristics	Internal code	Impedance (Ω) at 1MHz	Internal code	Packaging style	Internal code

CHARACTERISTICS SPECIFICATION TABLE

Impedance [1MHz] (Ω)Typ.	(Ω)Min.	DC resistance (Ω)max.	(Ω)Typ.	Rated current* Itemp (mA)max.	Part No.
60	45	0.364	0.280	700	MAF2520ASS600CT000

*Please refer to the graph of rated current vs. temperature characteristics (derating) about the rating current at 85°C or more in temperature of the product.

Measurement equipment

Measurement item	Product No.	Manufacturer
Impedance	4294A+16034G	Keysight Technologies
DC resistance	Type-7561	Yokogawa

∗ Equivalent measurement equipment may be used.

Package quantity	3,000 pcs/reel

TEMPERATURE RANGE, INDIVIDUAL WEIGHT

Operating temperature range*	Storage temperature range**	Individual weight
–40 to +125 °C	–40 to +85 °C	20 mg

* Operating temperature range includes self-temperature rise.
** The storage temperature range is for after the assembly.

REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using this products.

⚠ REMINDERS

- The storage period is less than 12 months. Be sure to follow the storage conditions (temperature: 5 to 40°C, humidity: 10 to 75% RH or less).
  If the storage period elapses, the soldering of the terminal electrodes may deteriorate.
- Do not use or store in locations where there are conditions such as gas corrosion (salt, acid, alkali, etc.).
- Before soldering, be sure to preheat components.
  The preheating temperature should be set so that the temperature difference between the solder temperature and chip temperature does not exceed 150°C.
- Soldering corrections after mounting should be within the range of the conditions determined in the specifications.
  If overheated, a short circuit, performance deterioration, or lifespan shortening may occur.
- When embedding a printed circuit board where a chip is mounted to a set, be sure that residual stress is not given to the chip due to the overall distortion of the printed circuit board and partial distortion such as at screw tightening portions.
- Self heating (temperature increase) occurs when the power is turned ON, so the tolerance should be sufficient for the set thermal design.
- Carefully lay out the coil for the circuit board design of the non-magnetic shield type.
  A malfunction may occur due to magnetic interference.
- Use a wrist band to discharge static electricity in your body through the grounding wire.
- Do not expose the products to magnets or magnetic fields.
- Do not use for a purpose outside of the contents regulated in the delivery specifications.
- The products listed on this catalog are intended for use in general electronic equipment (AV equipment, telecommunications equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measurement equipment, industrial robots) under a normal operation and use condition.
  The products are not designed or warranted to meet the requirements of the applications listed below, whose performance and/or quality require a more stringent level of safety or reliability, or whose failure, malfunction or trouble could cause serious damage to society, person or property.
  If you intend to use the products in the applications listed below or if you have special requirements exceeding the range or conditions set forth in the each catalog, please contact us.

(1) Aerospace/aviation equipment
(2) Transportation equipment (cars, electric trains, ships, etc.)
(3) Medical equipment
(4) Power-generation control equipment
(5) Atomic energy-related equipment
(6) Seabed equipment
(7) Transportation control equipment
(8) Public information-processing equipment
(9) Military equipment
(10) Electric heating apparatus, burning equipment
(11) Disaster prevention/crime prevention equipment
(12) Safety equipment
(13) Other applications that are not considered general-purpose applications

When designing your equipment even for general-purpose applications, you are kindly requested to take into consideration securing protection circuit/device or providing backup circuits in your equipment.
