## Switch Mode Power Rectifiers

16 A, 35 and 45 V

These state-of-the-art devices use the Schottky Barrier principle with a platinum barrier metal.

### Features

- Guard-ring for Stress Protection
- Low Forward Voltage
- 175°C Operating Junction Temperature
- NRVB Prefix for Automotive and Other Applications Requiring Unique Site and Control Change Requirements; AEC-Q101 Qualified and PPAP Capable
- These Devices are Pb-Free and are RoHS Compliant

### Mechanical Characteristics:

- Case: Epoxy, Molded
- Weight: 1.9 Grams for TO-220  
1.7 Grams for D<sup>2</sup>PAK
- Finish: All External Surfaces Corrosion Resistant and Terminal Leads are Readily Solderable
- Lead Temperature for Soldering Purposes:  
260°C Max. for 10 Seconds

### MAXIMUM RATINGS

| Rating                                                                                                                      | Symbol      | Value       | Unit             |
|-----------------------------------------------------------------------------------------------------------------------------|-------------|-------------|------------------|
| Peak Repetitive Reverse Voltage                                                                                             | $V_{RRM}$   |             | V                |
| Working Peak Reverse Voltage                                                                                                | $V_{RWM}$   |             |                  |
| DC Blocking Voltage                                                                                                         | $V_R$       | 35          |                  |
| MBR1635                                                                                                                     |             | 45          |                  |
| MBR1645                                                                                                                     |             | 45          |                  |
| MBRB1645                                                                                                                    |             |             |                  |
| Average Rectified Forward Current Delay<br>(Rated $V_R$ , $T_C = 163^\circ\text{C}$ ) Total Device                          | $I_{F(AV)}$ | 16          | A                |
| Peak Repetitive Forward Current, Per Leg<br>(Rated $V_R$ , Square Wave,<br>20 kHz, $T_C = 157^\circ\text{C}$ ) Total Device | $I_{FRM}$   | 32          | A                |
| Non-Repetitive Peak Surge Current<br>(Surge Applied at Rated Load Conditions<br>Halfwave, Single Phase, 60 Hz)              | $I_{FSM}$   | 150         | A                |
| Peak Repetitive Reverse Surge Current<br>(2.0 $\mu\text{s}$ , 1.0 kHz)                                                      | $I_{RRM}$   | 1.0         | A                |
| Storage Temperature Range                                                                                                   | $T_{stg}$   | -65 to +175 | °C               |
| Operating Junction Temperature (Note 1)                                                                                     | $T_J$       | -65 to +175 | °C               |
| Voltage Rate of Change (Rated $V_R$ )                                                                                       | $dv/dt$     | 10,000      | V/ $\mu\text{s}$ |

Stresses exceeding Maximum Ratings may damage the device. Maximum Ratings are stress ratings only. Functional operation above the Recommended Operating Conditions is not implied. Extended exposure to stresses above the Recommended Operating Conditions may affect device reliability.

1. The heat generated must be less than the thermal conductivity from Junction-to-Ambient:  $dP_J/dT_J < 1/R_{\theta JA}$ .
