

**GaAs MULTI-CHIP
INTEGRATED CIRCUIT****MC-5951****FEATURES**

- **LOW DISSIPATIVE CURRENT**
Total Current $I_{DD} = 330$ mA (Typ.) at $P_{OUT} = 30.0$ dBm
- **HIGH EFFICIENCY:**
Total Efficiency, $\eta_T = 63\%$ (Typ.) at P_{OUT} Maximum
- **SMALL SIZE**

DESCRIPTION

The MC-5951 is a two stage GaAs Multi-Chip Integrated Circuit (MCIC), designed to be used as the Power Amplifier in a cellular portable or handheld application. Its optimum frequency range of 824-849 MHz makes it ideal for cellular analog phones for use in the U.S. (AMPS). With separate access provided to both drain supplies, the output power can be effectively controlled. With over 1 Watt output power, excellent efficiency and small size, this MCIC has advantages for a variety of portable wireless applications.
