MC34051**

## Dual EIA-422/423 Transceivers

The MC34050/51 are dual transceivers which comply with EIA Standards EIA-422 (Balanced line) and EIA-423 (Unbalanced line). Each device contains two drivers and two receivers.

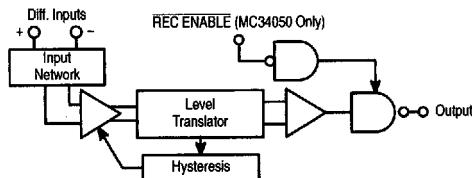

The MC34050 has a DRIVER ENABLE (for both drivers) and a RECEIVER ENABLE (for both receivers). Connecting the two ENABLES together provides Driver-to-Receiver switching from a single line.

The MC34051 has a DRIVER ENABLE for each driver. The two receivers are permanently enabled.

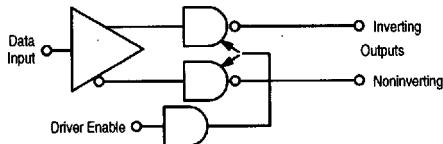

The Driver inputs, Receiver outputs, and Enable inputs are 74LS TTL compatible.

- Two Independent Drivers and Receivers Per Package
- 3-State Outputs
- Single 5.0 V Supply
- Internal Hysteresis (50 mV Typical) on Receivers
- Receivers Provide Fail-Safe Function. Output Stays High if Inputs are Open, Shorted (floating), or Terminated (floating)
- Receivers May Be Used in EIA-422 or 423 Systems
- Drivers Meet Full EIA-422 Standards

## MAXIMUM RATINGS

| Rating  | Value         | Units |
|---|---------------|-------|
| Power Supply Voltage (V <sub>CC</sub> )           | 7.0           | Vdc   |
| Input Common Mode Voltage (Receivers)             | ± 25          | Vdc   |
| Input Differential Voltage (Receivers)            | ± 25          | Vdc   |
| Output Sink Current (Receivers)                   | 50            | mA    |
| Enable Input Voltage (Drivers and Receivers)      | 5.5           | Vdc   |
| Input Voltage (Drivers)                           | 5.5           | Vdc   |
| Applied Output Voltage (3-State mode) – Receivers | –1.0 to + 7.0 | Vdc   |
| Applied Output Voltage (3-State mode) – Drivers   | –1.0 to + 7.0 | Vdc   |
| Junction Temperature                              | – 65 to + 150 | °C    |
| Storage Temperature                               | – 65 to + 150 | °C    |

Devices should not be operated at these values.

The "Recommended Operating Limits" provide for actual device operation.

## RECOMMENDED OPERATING LIMITS

| Characteristic                               | Min    | Typ   | Max    | Unit |
|--|--------|-------|--------|------|
| Power Supply Voltage                         | + 4.75 | + 5.0 | + 5.25 | Vdc  |
| Input Common Mode Voltage (Receivers)        | – 7.0  | –     | + 7.0  | Vdc  |
| Input Differential Voltage (Receivers)       | – 6.0  | –     | + 6.0  | Vdc  |
| Enable Input Voltage (Drivers and Receivers) | 0      | –     | + 5.25 | Vdc  |
| Input Voltage (Drivers)                      | 0      | –     | + 5.25 | Vdc  |
| Ambient Temperature Range                    | 0      | –     | + 70   | °C   |

**ELECTRICAL CHARACTERISTICS** (Unless otherwise noted, specifications apply for 4.75 < V<sub>CC</sub> < 5.25 V, and 0° < T<sub>A</sub> < 70°C).
