

MCZ5216ST

LLC Current Resonant Mode Controller

Feature

- Robust 600V direct gate driver
- HV Startup function
- X-cap Discharge
- Vcc(max)=35V
- Active Stand-by function
- Burst mode function
- Soft Starting function
- Operating frequency 500kHz is available
- Over current protection(OCP1)
- Over current protection for peak load(OCP2)
- Correction of OLP(OCP2) level based on the input voltage
- Capacitive mode protection
- Two-step timer latch function
- Latching protection with external signal is possible
- Vc1 OVP(Latching protection) is possible
- Low input voltage protection(Vsen)
- Thermal Shutdown
- Halogen free
- Pb free
- RoHS:Yes

注意

Notes

推奨動作条件の範囲を超えて使用すると、信頼性に影響を及ぼす場合があります。

It might influence reliability when using it exceeding the range of recommended operating conditions.

本ICを御使用の際は絶対最大定格を越えないようにしてください。絶対最大定格を超えた場合、ICが破壊する可能性があります。破壊した場合、その破壊モード(オープンモード、ショートモード)は特定できませんので、ヒューズなど物理的な安全対策を施すようお願いします。

Do not use this IC beyond its absolute maximum ratings to prevent the IC from potential damage. Since the kind of destructive mode cannot be identified (open mode, short mode), take safety measures such as fusing.

Notes

1. If you wish to use any such product, please be sure to refer to the specifications issued by Shindengen.
2. All products described or contained herein are designed with a quality level intended for use in standard applications requiring an ordinary level of reliability. If these products are to be used in equipment or devices for special or specific applications requiring an extremely high grade of quality or reliability in which failures or malfunctions of products may directly affect human life or health, a local Shindengen office must be contacted in advance to confirm that the intended use of the product is appropriate. Shindengen products are grouped into the following three applications according the quality grade.

【Standard applications】

Computers, office automation and other office equipment, communication terminals, test and measurement equipment, audio/visual equipment, amusement equipment, consumer electronics, machine tools, personal electronic equipment, industrial equipment, etc.

【Special applications】

Transportation equipment (vehicles, ships, etc.), trunk-line communication equipment, traffic signal control systems, anti-disaster/crime systems, safety equipment, medical equipment, etc.

【Specific applications】

Nuclear reactor control systems, aircraft, aerospace equipment, submarine repeaters, life support equipment and systems, etc.

3. Although Shindengen continuously endeavors to enhance the quality and reliability of its products, customers are advised to consider and take safety measures in their design, such as redundancy, fire containment and anti-failure, so that personal injury, fires, or societal damages can be prevented.
4. Please note that all information described or contained herein is subject to change without notice due to product upgrades and other reasons. When buying Shindengen products, please contact the Company's offices or distributors to obtain the latest information.
5. Shindengen shall not bear any responsibility with regards to damages or infringement of any third-party patent rights and other intellectual property rights incurred due to the use of information on this website.
6. The information and materials on this website neither warrant the use of Shindengen's or any third party's patent rights and other intellectual property rights, nor grant license to such rights.
7. In the event that any product described or contained herein falls under the category of strategic products controlled under the Foreign Exchange and Foreign Trade Control Law of Japan, exporting of such products shall require an export license from the Japanese government in accordance with the above law.
8. No reprinting or reproduction of the materials on this website, either in whole or in part, is permitted without proper authorization from Shindengen.
