MJ10001 Silicon NPN Transistor HV Darlington Power Amp, Switch TO-3 Type Package

Description:

The MJ10001 is a silicon NPN Darlington transistor in a TO-3 type package designed for high voltage, high-speed, power switching in inductive circuits where fall-time is critical. They are particularly suited for line operated switch-mode applications.

Applications:

- Switching Regulators
- Inverters
- Solenoid and Relay Drivers
- Motor Controls
