

ML7631

13.56MHz Wireless charging transmitter LSI

■ Overview

The ML7631 is a wireless charging Tx LSI using 13.56MHz carrier frequency, which enables to feed 200mW wirelessly to an Rx device using the ML7630. The ML7631 controls wireless charging and data communication with the ML7630.

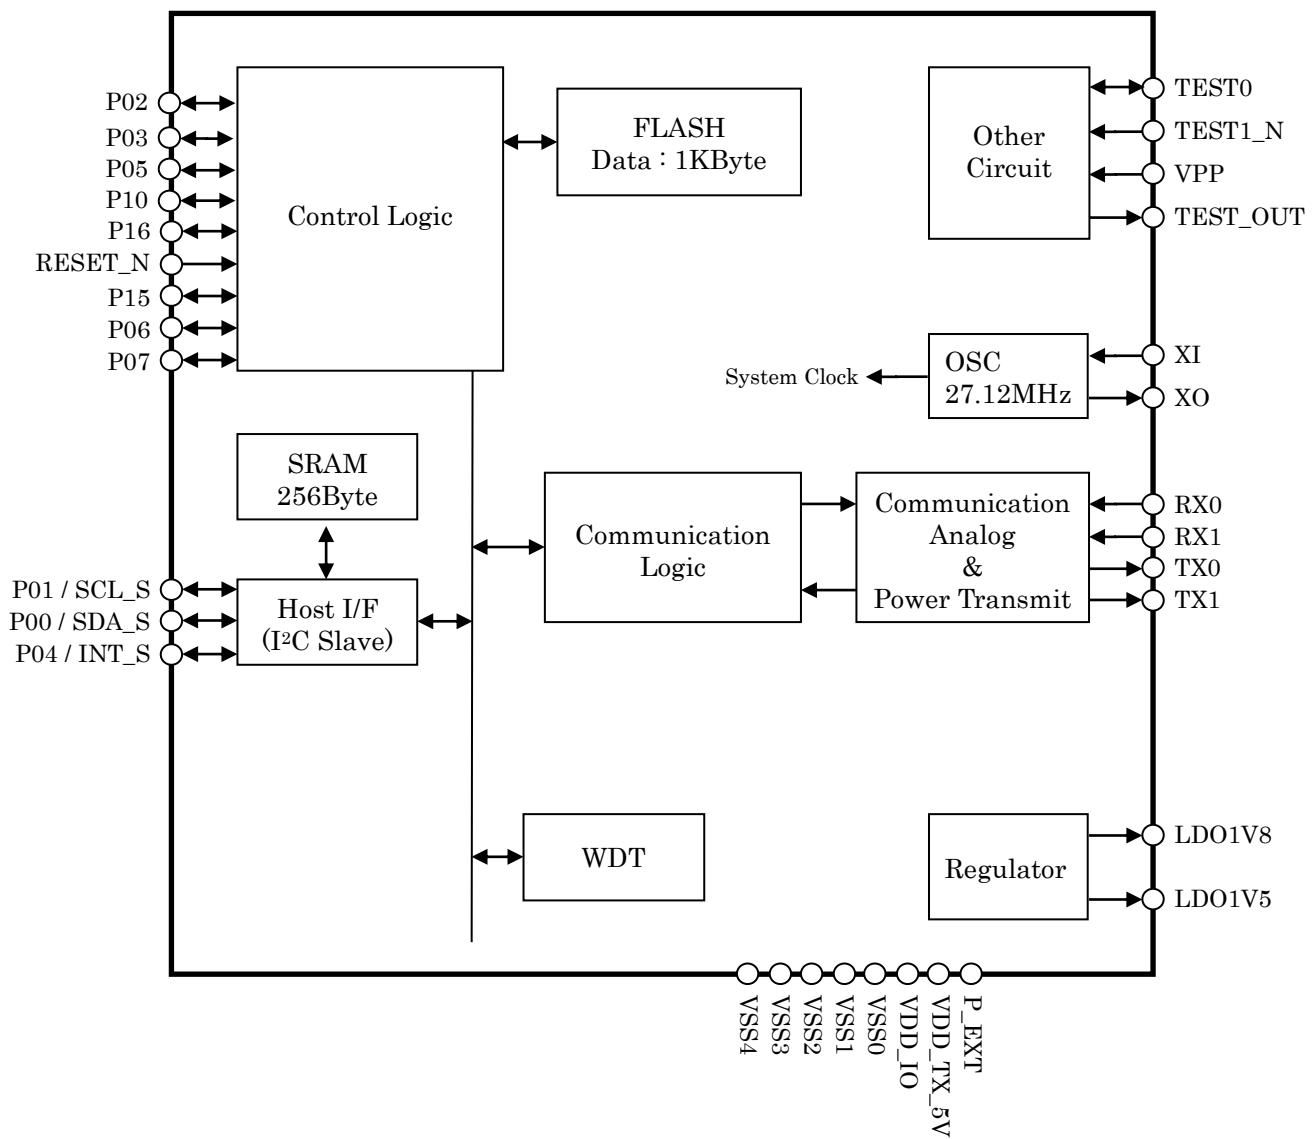

ML7631 is equipped with function to detect the illegal situation such as disappearance of the Rx device. This is an ideal solution for small rechargeable devices such as headset, ear-pads and wearables.

■ Features

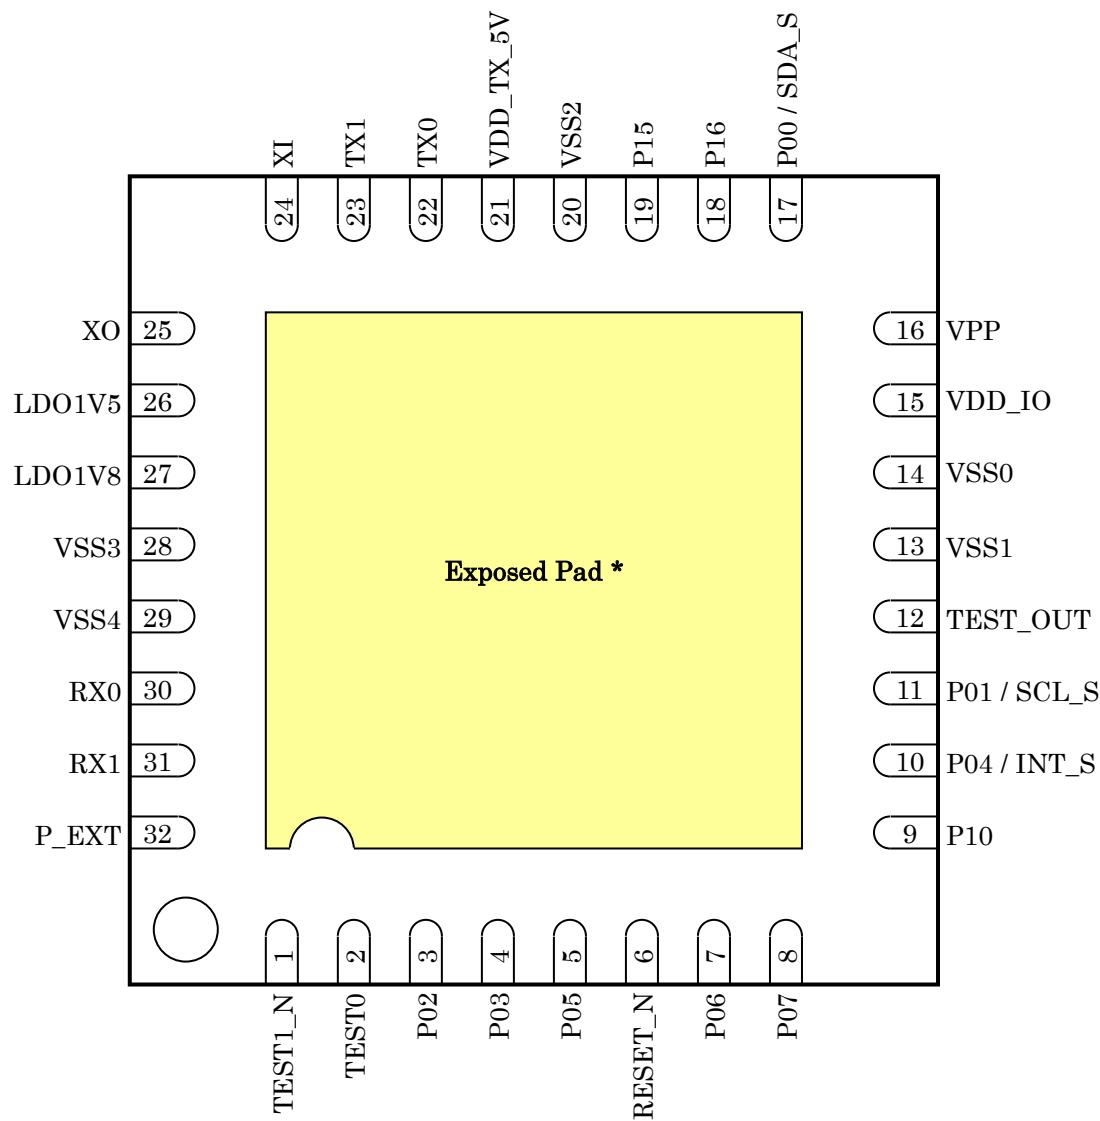

- Power transmission control
 - Power transmission circuit embedded
 - Abnormality detection by software control and hardware control(voltage and current monitoring)
- Communication control
 - Command generation function for ML7630 included
 - Communication speed: 212kbps (13.56MHz/64)
 - 1kbyte data flash for storing some data contents
- Host interface(I²C slave)
 - Normal mode(100kbit/s), Fast mode(400kbit/s) available
 - Each internal controller and external HOST microcontroller can access register function
- General Port(PORT)
 - Input/Output port×11ch
- Reset
 - Reset by RESET_N port
 - Power on reset by magnetic field detection
 - Reset by WDT overflow
- Clock
 - Low speed clock : Built-in RC oscillation (32.768kHz) for internal timer
 - High speed clock : Crystal oscillation(27.12MHz) 6.78MHz is used inside
- Package
 - WQFN 32 pin (P-WQFN32-0505-0.50)

- Product name
ML7631-103GD
ML7631-106GD
- Applications
NFC charging devices, e.g.
 - smart wathes, fitness trackers and smart wristbands
 - smart rings
 - smart glasses
 - true wireless stereos and hearing aids
 - stylus pnes, wireless mouses and wireless keyboards
 - electric toothbrushes
 - beauty home appliances
 - personal health care devices
 - battery packs

	IDD2	CPU 6.78MHz operation Peripherals stop	—	2.2	3.0	mA
	IDD3	CPU 6.78MHz operation Power transmission mode (100Ω instead of antenna between TX0-TX1) *2	—	85	105	mA

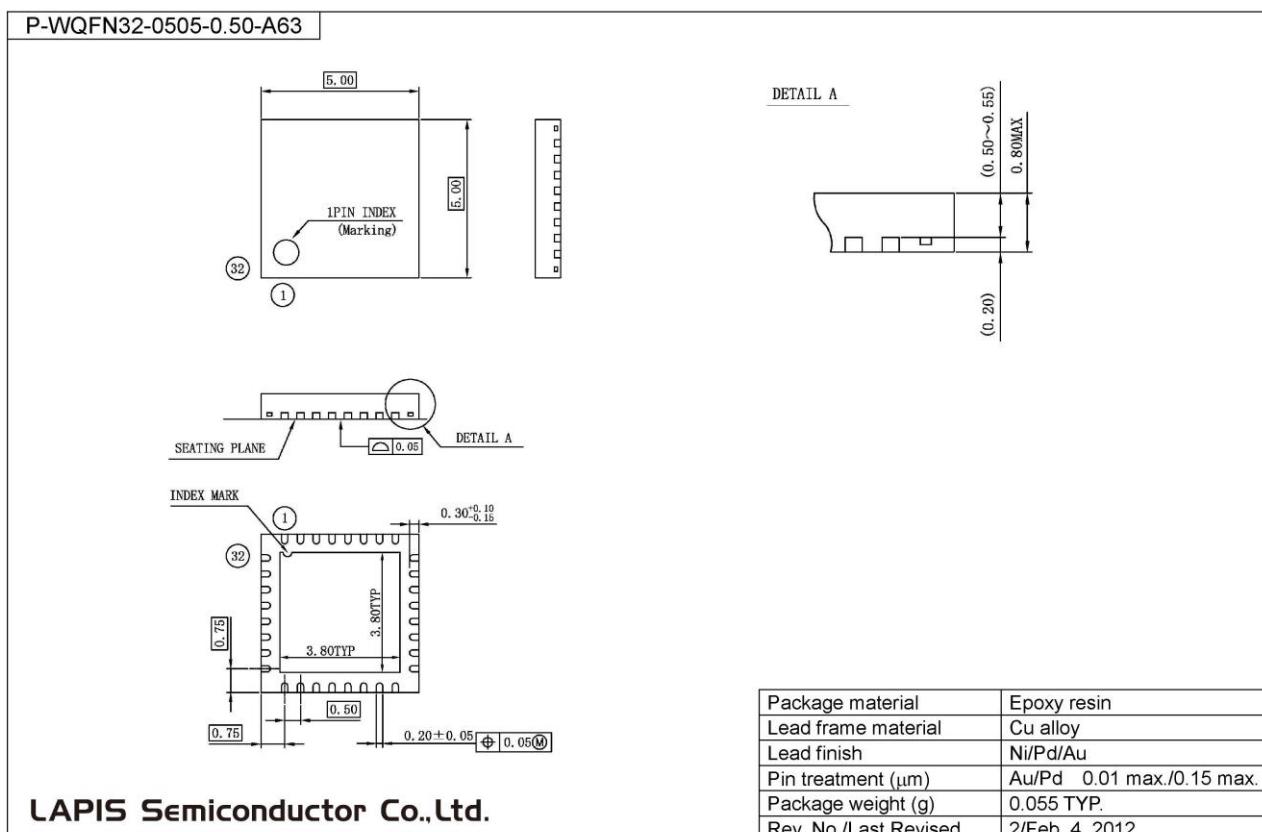

*1) CPU Stops. This status can be released by peripheral interrupt.

*2) This condition and power supply current depend on the antenna.

If load resistance is small, the power supply current increases.

It does not guarantee the current consumption when the system including the power receiving side is installed.

Precaution on using ROHM Products

- 1) When using ROHM Products, refer to the latest product information and ensure that usage conditions (absolute maximum ratings^{*1}, recommended operating conditions, etc.) are within the ranges specified. ROHM disclaims any and all liability for any malfunctions, failure or accident arising out of or in connection with the use of ROHM Products outside of such usage conditions specified ranges, or without observing precautions. Even if it is used within such usage conditions specified ranges, semiconductors can break down and malfunction due to various factors. Therefore, in order to prevent personal injury, fire or the other damage from break down or malfunction of ROHM Products, please take safety at your own risk measures such as complying with the derating characteristics, implementing redundant and fire prevention designs, and utilizing backups and fail-safe procedures.

*1: Absolute maximum ratings: a limit value that must not be exceeded even momentarily.

- 2) The Products specified in this document are not designed to be radiation tolerant.
- 3) Descriptions of circuits, software and other related information in this document are provided only to illustrate the standard operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. And the peripheral conditions must be taken into account when designing circuits for mass production. ROHM disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, and other related information.
- 4) No license, expressly or implied, is granted hereby under any intellectual property rights or other rights of ROHM or any third party with respect to ROHM Products or the information contained in this document (including but not limited to, the Product data, drawings, charts, programs, algorithms, and application examples, etc.). Therefore, ROHM shall have no responsibility whatsoever for any dispute, concerning such rights owned by third parties, arising out of the use of such technical information.
- 5) ROHM intends our Products to be used in a way indicated in this document. Please be sure to contact a ROHM sales office if you consider the use of our Products in different way from original use indicated in this document. For use of our Products in medical systems, please be sure to contact a ROHM representative and must obtain written agreement. Do not use our Products in applications which may directly cause injuries to human life, and which require extremely high reliability, such as aerospace equipment, nuclear power control systems, and submarine repeaters, etc. ROHM disclaims any and all liability for any losses and damages incurred by you or third parties arising by using the Product for purposes not intended by us without our prior written consent.
- 6) Please use the Products in accordance with any applicable environmental laws and regulations, such as the RoHS Directive. ROHM shall have no responsibility for any damages or losses resulting non-compliance with any applicable laws or regulations.
- 7) When providing our Products and technologies contained in this document to other countries, you must abide by the procedures and provisions stipulated in all applicable export laws and regulations, including without limitation the US Export Administration Regulations and the Foreign Exchange and Foreign Trade Act.
- 8) Please contact a ROHM sales office if you have any questions regarding the information contained in this document or ROHM's Products.
- 9) This document, in part or in whole, may not be reprinted or reproduced without prior consent of ROHM.

(Note) "ROHM" as used in this document means ROHM Co., Ltd.

Other Precaution

- 1) All information contained in this document is subject to change for the purpose of improvement, etc. without any prior notice. Before purchasing or using ROHM Products, please confirm the latest information with a ROHM sales office.
- 2) ROHM has used reasonable care to ensure the accuracy of the information contained in this document, however, ROHM shall have no responsibility for any damages, expenses or losses arising from inaccuracy or errors of such information.
