

MS4515

SPECIFICATIONS

- PCB Mounted Pressure Transducers
- Pressure Ranges from 2 to 30 inches H₂O
- Amplified Ratiometric Analog Output
- Differential & Gage
- Temperature Compensated
- 3.3V or 5.0 Vdc Supply Voltage

The MS4515 is a small, ceramic based, PCB mounted pressure transducer from Measurement Specialties. The transducer is built using the latest CMOS sensor conditioning circuitry to create a low cost, high performance transducer designed to meet the strictest requirements from OEM customers.

The MS4515 is fully calibrated and temperature compensated with a total error band (TEB) of less than 1.0% over the compensated range. The sensor operates from single supply of either 3.3 or 5.0Vdc and requires a single external component for proper operation.

The rugged ceramic transducer is available in side port, top port, and manifold mount versions and can measure gage or differential pressure from 2 to 30 inches H₂O. The 1/8" barbed pressure ports mate securely with 3/32" ID tubing.

FEATURES

- Inches H₂O Pressure Ranges
- PCB Mountable
- High Level Analog Output
- Barbed Pressure Ports

APPLICATIONS

- Blocked Filter Detection
- Altitude and Airspeed Measurements
- Medical Instruments
- Fire Suppression System
- Panel Meter
- Air Movement/Environmental Controls
- Pneumatic Controls

Notes

- Proper operation requires an external capacitor placed as shown in Connection Diagram. Output is ratiometric to supply voltage variations of less than 10%.
- Accuracy: The maximum deviation from a best fit straight line (BFSL) fitted to the output measured over the pressure range at 25°C. Includes all errors due to pressure non linearity, hysteresis, and non repeatability.
- Total error band includes all accuracy errors, thermal errors over the compensated temperature range, and span and offset calibration tolerances. For ideal sensor output with respect to input pressure, reference Pressure Transfer Function charts below. TEB values are valid only at the calibrated supply voltage.
- For errors beyond the compensated temperature range, see Extended Temperature Multiplier chart below.
- This product can be configured for custom OEM requirements, contact factory for lower power consumption or higher accuracy.

Notes

- Place 100nF capacitor between Supply and GND to within 2 cm of sensor.

PACKAGE, PINOUT & PRESSURE TYPE CONFIGURATION

Pin Name	Pin	Function
SUPPLY	2	Positive Supply Voltage
OUTPUT	3	Analog Output
GND	4	Ground
	1, 5-8	No Connection

Pressure Type	Pmin	Pmax	Description
Differential/ Bidirectional	-Prange	+Prange	Output is proportional to the difference between Port 1 and Port 2. Output swings positive when Port 1 > Port 2. Output is 50% of supply voltage when Port 1=Port 2
Gage	0psiG	+Prange	Output is proportional to the difference between 0psiG (Pmin) and Port 1. Output swings positive when Port 1 > Port 2.

Prange is equal to the maximum full scale pressure specified in the ordering information.

AVAILABLE OPTIONS

Gel Coat (-F Option)

The MS4515 is designed for non ionic and clean dry air applications. Select this option for added protection in high humidity or slightly corrosive environments with the application of a silicone gel elastomer to sensor and ASIC. For questions concerning media compatibility, contact the factory.
