## Description

The MTN2310V8 is a N-channel enhancement-mode MOSFET, providing the designer with the best combination of fast switching, ruggedized device design, low on-resistance and cost effectiveness.

## Features

- Single Drive Requirement
- Low On-resistance
- Fast Switching Characteristic
- Dynamic dv/dt rating
- Repetitive Avalanche Rated
- Pb-free lead plating and halogen-free package

## Equivalent Circuit

## Outline

## Ordering Information

| Device           | Package                                                   | Shipping               |
