Description

Q2L Series 3x3 QFN are low capacitance SIDACTor® devices designed to protect high density broadband equipment from damaging overvoltage transients.

The series provides a low profile, chip scale surface mount solution that enables broadband equipment to comply with global regulatory standards while limiting the impact to broadband signals and board space.

Features and Benefits

- Low voltage overshoot
- Low on-state voltage
- Low capacitance
- Does not degrade with use
- Small SO-8 footprint
- Fails short circuit when surged in excess of ratings
