

PMB 6270

SMARTi SD

GSM/GPRS Single Chip RF IC

SMARTi SD (PMB 6270) is a member of Infineon Technologies widely successful SMARTi family of single chip radio transceivers, and the first one to benefit from CMOS technology. SMARTi SD is a quad-band (GSM850/900/1800/1900) single chip GSM/GPRS radio transceiver for worldwide roaming, optimized for cost, size and power consumption. SMARTi SD integrates into a single chip all functions required of the GSM radio of today and tomorrow. Through innovative transmit and receive architectures, SMARTi SD makes full use of CMOS technology to reach low radio system cost with long stand-by and talk time.

SMARTi SD is entirely controllable through a 3 wire bus. In combination with Infineon's E-GOLDlite and E-POWERlite a compact 3 chip system approach is achieved resulting in a very small and cost effective solution.

Technology

- Based on Infineons proven C11 0.13 μ m CMOS Technology
- Supply Voltage 1.5 V and 2.5 V
- P-VQFN-48 Package (7x7 mm)

Applications

- GSM/GPRS Dual-, Triple and Quad-Band Mobile Phones and Data Modems

Features

- Full Quad-Band solutions for GSM850/900/1800/1900
- Fully integrated RF VCO @ 3.8 GHz
- Sigma-Delta Synthesizer provides Ultra Fast locking time for GPRS class 12
- Multiplexed I/Q lines
- Direct Conversion Receiver with integrated blocking filters
- Integrated balanced LNAs for GSM850/900/1800/1900
- Programmable DC output level
- 3 wire bus
- Digital Sigma-Delta Modulator
- Ultra low power consumption
- Ultra Low RF BOM: < 35 components needed
