## General Description

The PT7V2727/3727 are low-cost, high-performance 3.3V/5.0v VCXO, designed to replace expensive VCXO modules. The on-chip voltage causes clocks to vary by  $\pm 120$ ppm. They use an inexpensive external pullable crystal at 27MHz to produce the same output frequency.

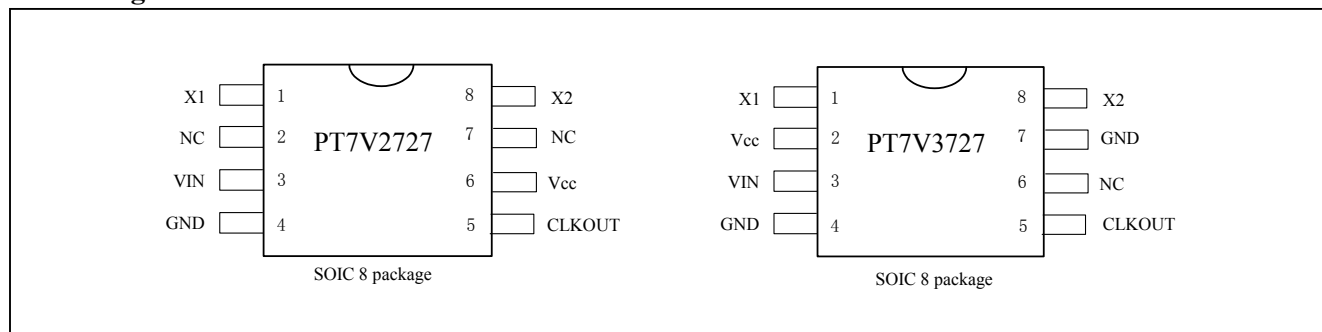

## Applications

- Set-Top Box
- xDSL
