**NEW Product**

The PTH03030 is a next generation series of non-isolated dc-dc converters offering some of the most advanced POL features available in the industry. The primary new feature provides for sequencing between multiple modules, a function, which is becoming a necessity for powering advanced silicon including DSP's, FPGA's and ASIC's requiring controlled power-up and power-down. Other industry leading features include margin up/down controls, pre-bias start-up capability and efficiencies up to 93%. The PTH03030 has an input voltage of 2.95 Vdc to 3.65 Vdc and offers a wide 0.8 Vdc to 2.5 Vdc output voltage range with up to 30 A output current, which allows for maximum design flexibility and a pathway for future upgrades.

**2 YEAR WARRANTY**

**All specifications are typical at nominal input, full load at 25 °C unless otherwise stated**  
 $C_{in} = 1500 \mu F$ ,  $C_{out} = 0 \mu F$

### Part Number System with Options

### Notes

- Remote ON/OFF. Positive Logic  
ON: Pin 3 open; or  $V > V_{in} - 0.5 \text{ V}$   
OFF: Pin 3 GND; or  $V < 0.8 \text{ V}$  (min - 0.2 V)
- See Figure 1 for safe operating curve.
- A 1,500  $\mu\text{F}$  electrolytic input capacitor is required for proper operation. The capacitor must be rated for a minimum of 900 mA rms of ripple current.
- An external output capacitor is not required for basic operation. Adding 330  $\mu\text{F}$  of distributed capacitance at the load will improve the transient response.
- 1 A/ $\mu\text{s}$  load step, 50 to 100%  $I_{Omax}$ ;  $C_{out} = 330 \mu\text{F}$ .
- If utilized  $V_{out}$  will track applied voltage by  $\pm 0.3 \text{ V}$  (up to  $V_o$  set point).
- The pre-bias start-up feature is not compatible with Auto-Track™. This is because when the module is under Auto-Track™ control, it is fully active and will sink current if the output voltage is below that of a back-feeding source. Therefore to ensure a pre-bias hold-off, one of the following two techniques must be followed when input power is first applied to the module. The Auto-Track™ function must either be disabled, or the module's output held off using the Inhibit pin. Refer to Application Note 152 for more details.
- Tape and reel packaging only available on the surface-mount versions.
- To order Pb-free (RoHS compatible) surface-mount parts replace the mounting option 'S' with 'Z', e.g. PTH03030WAZ. To order Pb-free (RoHS compatible) through-hole parts replace the mounting option 'H' with 'D', e.g. PTH03030WAD.
- NOTICE: Some models do not support all options. Please contact your local Artesyn representative or use the on-line model number search tool at <http://www.artesyn.com/powergroup/products.htm> to find a suitable alternative.
