4-Channel Motor Driver IC for DSC, DVC and Surveillance Cameras

Overview

The R2A30406NP is a semiconductor integrated circuit that incorporates driver circuits suitable for the motors of digital cameras.
By adopting an ultra-fine CMOS process, H bridge 4-ch of a full-swing drive was built in one chip.
It is considering as the high composition flexibility to realize low power consumption and miniaturization.

Features

- All bridges can be controlled independently.
  An ultra-fine CMOS process has been adopted for low power consumption in a design with no charge-pump.
- Built-in H bridge of a full-swing drive 4 circuit
- Built-in low-voltage malfunction prevention circuit
- Power supply systems are all internally isolated and include a function to prevent reverse current between power supplies.
- It is housed in a small package (24 PCSP 3.5x3.5 mm t=0.8mm)

Applications

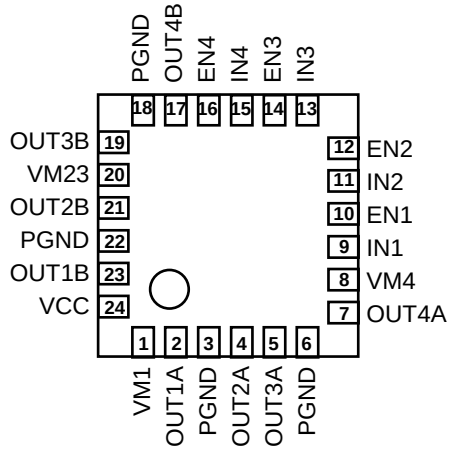
Motor driver for digital cameras, digital video camera, etc.

Recommended operating conditions

Power-supply voltage range — VCC:2.5~5.5V VM :2.5~5.5V
Rated power-supply voltage — VCC:3.0V VM :5.0V

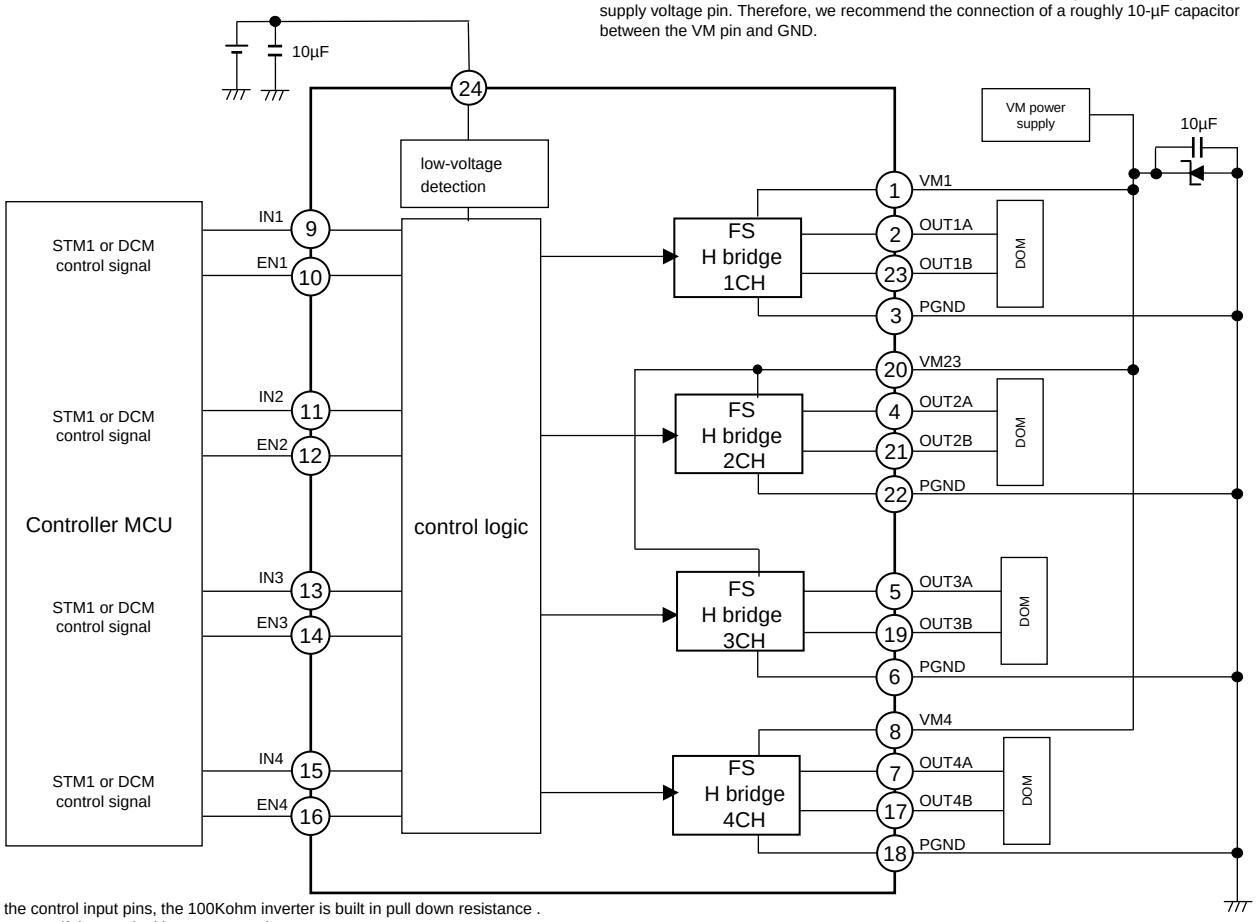
Pin assignment

Package : 24PCSP



Block diagram and application circuit example

Since loads such as motors and coils are inductive, overshoots may occur on the power-supply voltage pin. Therefore, we recommend the connection of a roughly 10-µF capacitor between the VM pin and GND.



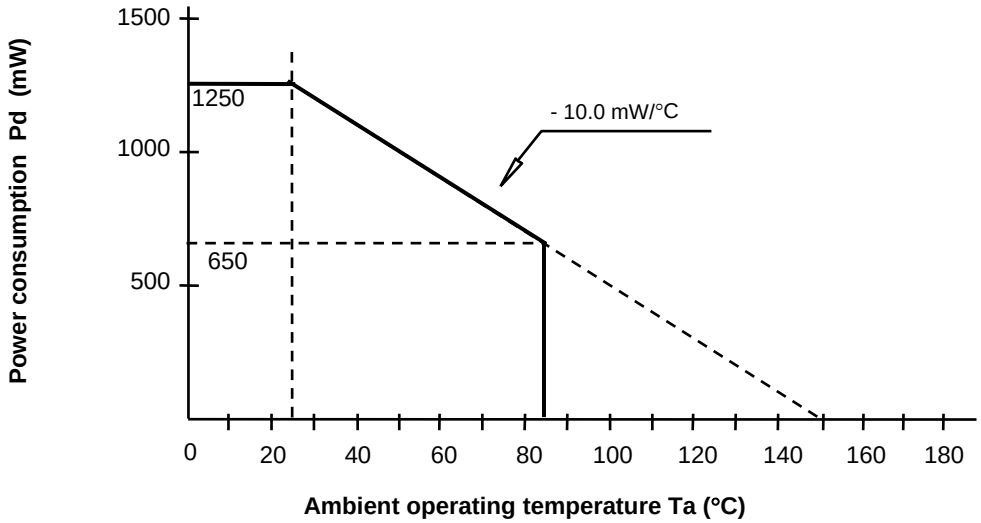
As for the control input pins, the 100Kohm inverter is built in pull down resistance .
It will operate, if the terminal is set as H-Active.
When the control input pins use is not carried out, ensure that the control input pins are either grounded or open-circuit (disconnected) while power is being supplied.

Absolute Maximum Ratings (Unless otherwise specified, the ambient temperature is 25°C)

Item	Symbol	Rated Value	Unit	Remarks
Power-supply voltage 1	VCC	6.5	V	See note 1 below.
Power-supply voltage 2	VM	6.5	V	See note 1 below.
Direct current (1ch~4ch)	Iod	±400	mA/ch	See note 4 below. DC
Instantaneous output current (1ch~4ch)	Iop	±600	mA/ch	See note 4 below. Pulse width < 10 ms, duty cycle ≤ 20%
Allowable power consumption	Pd	1250	mW	See note 2 below. Ta = 25°C
Thermal derating ratio	K	-10.0	mW/°C	See note 2 below. Ta ≥ 25°C
Max. junction temperature	Tj	150	°C	
Applied input voltages	Vin	-0.5~VCC+0.5	V	See note 3 below.
Ambient operating temperature	Topr	-25~85	°C	
Storage temperature	Tstg	-40~150	°C	

Notes: 1. As a rule, do not apply reverse power-supply voltages.
2. Glass epoxy board: 95 mm x 60 mm x 0.7 mm, copper-occupancy ratio in a 4-layer board: 15% in layers 1 and 4, 20% in layers 2 and 3.
3. As a rule, do not apply voltages above the power-supply voltage or below the GND voltage.
4. The total output current does not exceed the rated value in usage with multiple channels simultaneously turned on.

Thermal Derating Curve



Remark: The main component of power consumption by this IC is the power consumed by the output transistors on channels 1 to 4.
Expression for calculating power consumption by the output transistors
$Pd_{(F/S)}$ = (output current)² x ON resistance E.g. $Pd_{(FS)}$ = (300mA)² x 1.5ohm=135mW

When the ambient temperature is 25°C or more, refer to the above figure in selecting the required heat sink.

Pin Functions

Pin No.	Pin Name	Pin Function
1	VM1	Motor power supply for channel 1
2	OUT1A	Channel 1 A output
3	PGND	Channel 1 power GND
4	OUT2A	Channel 2 A output
5	OUT3A	Channel 3 A output
6	PGND	Channel 3 power GND
7	OUT4A	Channel 4 A output
8	VM4	Motor power supply for channels 4
9	IN1	Channels 1 Control input
10	EN1	Channels 1 Enable terminal
11	IN2	Channels 2 Control input
12	EN2	Channels 2 Enable terminal
13	IN3	Channels 3 Control input
14	EN3	Channels 3 Enable terminal
15	IN4	Channels 4 Control input
16	EN4	Channels 4 Enable terminal
17	OUT4B	Channel 4 B output
18	PGND	Channel 4 power GND
19	OUT3B	Channel 3 B output
20	VM23	Motor power supply for channels 2 and 3
21	OUT2B	Channel 2 B output
22	PGND	Channel 2 power GND
23	OUT1B	Channel 1 B output
24	VCC	Control power supply

Ordering Information

Orderable Part No.	Package Code	Quantity

Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
2. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
3. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
4. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from such alteration, modification, copy or otherwise misappropriation of Renesas Electronics product.
5. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The recommended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.
   "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots etc.
   "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; and safety equipment etc.
   Renesas Electronics products are neither intended nor authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems, surgical implantations etc.), or may cause serious property damages (nuclear reactor control systems, military equipment etc.). You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application for which it is not intended. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for which the product is not intended by Renesas Electronics.
6. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
7. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or systems manufactured by you.
8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
9. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You should not use Renesas Electronics products or technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. When exporting the Renesas Electronics products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations.
10. It is the responsibility of the buyer or distributor of Renesas Electronics products, who distributes, disposes of, or otherwise places the product with a third party, to notify such third party in advance of the contents and conditions set forth in this document, Renesas Electronics assumes no responsibility for any losses incurred by you or third parties as a result of unauthorized use of Renesas Electronics products.
11. This document may not be reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.

(Note 1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.

(Note 2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
