Notes

- As a result of the particularity of inner structure of SAW products, it easy to be breakdown by electrostatic, so we should pay attention to **ESD protect** in the test.
- Static voltage** between signal load and ground may cause deterioration and destruction of the component. Please avoid static voltage.
- Ultrasonic cleaning** may cause deterioration and destruction of the component. Please avoid ultrasonic cleaning.
- Only leads of component may **be soldered**. Please avoid soldering another part of component.
- There is a close relationship between the device's performance and **matching network**. The specifications of this device are based on the test circuit shown above. L and C values may change depending on board layout. Values shown are intended as a guide only.
