

RLT1080-10G

- Infrared FP Radiation Source
- 1080 nm \pm 10 nm
- 10 mW CW
- 9 mm TO package, flat window
- Built in Monitor PD

Description

RLT1080-10G is a Laser Diode emitting at 1080 nm with rated output power of 10 mW CW at room temperature. The 9 mm TO package includes a cap and flat window, and contains a built in **monitor PD**.

Mounting Instruction

In order to maintain lifetime and stability of the laser diode it is essential to provide efficient heat management. Heat dissipation is possible through the base plate only. For long time stable operation proper contact between laser diode base plate and heat sink is mandatory.

Safety Advice

This laser module emits highly concentrated ultra violet light which can be **hazardous to the human eye**. This module is classified as **Class 3B laser product** according to **IEC 60825-1** and **21 CFR Part 1040.10 Safety Standards**. Actual laser light emitted and precautions necessary strongly depend on mode of operation.

This product is comply with 21 CFR Part 1040.10
