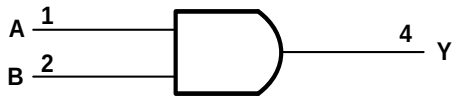
LOGIC SYMBOL



DESCRIPTION

The RS1G08 single 2-input positive-AND gate is designed for 1.65V to 5.5V V_{CC} operation.

The RS1G08 device performs the Boolean function Y=A • B or Y= $\overline{\overline{A} + \overline{B}}$ in positive logic. The device is fully specified for partial-power-down applications using I_{off}. The I_{off} circuitry disables the outputs, preventing damaging current backflow through the device when it is powered down.

The RS1G08 is available in Green SOT23-5 and SC70-5 packages. It operates over an ambient temperature range of -40°C to +125°C.
