### DESCRIPTION

The RS2G00 dual 2-input positive-NAND gate is designed for 1.65V to 5.5V V<sub>cc</sub> operation.

The RS2G00 device performs the Boolean function Y=Ā • B or Y=Ā + B̄ in positive logic. The device is fully specified for partial-power-down applications using I<sub>off</sub>. The I<sub>off</sub> circuitry disables the outputs, preventing damaging current backflow through the device when it is powered down.

The RS2G00 is available in Green MSOP-8 packages. It operates over an ambient temperature range of -40°C to +125°C.
