**Description**

RS485 series is the fully isolation and half duplex transceiver, which integrates with the power isolation, electrical isolation, the RS-485 interface chip and the bus protection function. It is suitable for the data transmission for bidirectional data communication or multi node bus. The maximum transmission data rate is up to 19200bps. It is built-in isolated DC/DC inverter, with the isolation voltage up to 3KVDC. It is small, no need peripheral circuit, convenient to embed the user equipment. The bus is with the ESD protection function, meets the standard of IEC61000-4-2.
