SGM7222
High Speed USB 2.0 (480Mbps) DPDT Analog Switch

GENERAL DESCRIPTION

The SGM7222 is a high-speed, low-power double-pole/ double-throw (DPDT) analog switch that operates from a single 1.8V to 4.3V power supply.

The SGM7222 is designed for the switching of high-speed USB 2.0 signals in handset and consumer applications, such as cell phones, digital cameras, and notebooks with hubs or controllers with limited USB I/Os.

The SGM7222 has low bit-to-bit skew and high channel-to-channel noise isolation, and is compatible with various standards, such as high-speed USB 2.0 (480Mbps). Each switch is bidirectional and offers little or no attenuation of the high-speed signals at the outputs. Its bandwidth is wide enough to pass high-speed USB 2.0 differential signals (480Mbps) with good signal integrity.

The SGM7222 contains special circuitry on the D+/D- pins which allows the device to withstand a V_{BUS} short to D+ or D- when the USB devices are either powered off or powered on.

The SGM7222 is available in Green TQFN-1.8×1.4-10L, MSOP-10 and UTQFN-1.8 × 1.4-10L packages. It operates over an ambient temperature range of -40℃ to +85℃.

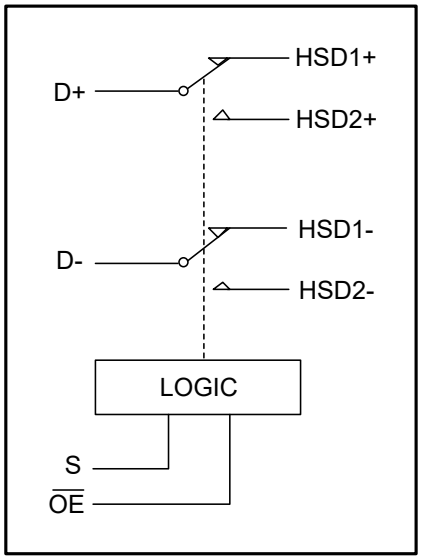
APPLICATIONS

Route Signals for USB 2.0
MP3 and Other Personal Media Players
Digital Cameras and Camcorders
Portable Instrumentation
Set-Top Boxes
PDAs

FEATURES

- **R_{ON} is Typically 4.5Ω at 3V**
- **Low Bit-to-Bit Skew: 50ps (TYP)**
- **Voltage Operation: 1.8V to 4.3V**
- **Fast Switching Times:**
  t_{ON} = 10ns
  t_{OFF} = 22ns
- **Low Crosstalk: -41dB at 250MHz**
- **Power-Off Protection when V_+ = 0V,**
  D+/D- Pins can Tolerate up to 5.25V
- **High Off-Isolation: -35dB at 250MHz**
- **Rail-to-Rail Input and Output Operation**
- **Break-Before-Make Switching**
- **Extended Industrial Temperature Range:**
  -40℃ to +85℃
- **Available in Green MSOP-10, TQFN-1.8×1.4-10L and UTQFN-1.8×1.4-10L Packages**

BLOCK DIAGRAM



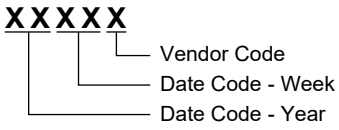
PACKAGE/ORDERING INFORMATION

MODEL	PACKAGE DESCRIPTION	SPECIFIED TEMPERATURE RANGE	ORDERING NUMBER	PACKAGE MARKING	PACKING OPTION
SGM7222	MSOP-10	-40℃ to +85℃	SGM7222YMS10/TR	SGM7222 YMS10 XXXXX	Tape and Reel, 3000
	TQFN-1.8×1.4-10L	-40℃ to +85℃	SGM7222YWQ10/TR	7222	Tape and Reel, 3000
	UTQFN-1.8×1.4-10L	-40℃ to +85℃	SGM7222YUWQ10/TR	CAA XXX	Tape and Reel, 3000

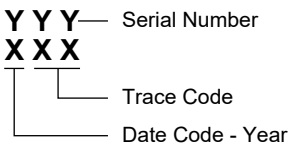
MARKING INFORMATION

NOTE: XXX = Date Code and Trace Code. XXXXX = Date Code and Vendor Code.

MSOP-10



UTQFN-1.8×1.4-10L



Green (RoHS & HSF): SG Micro Corp defines "Green" to mean Pb-Free (RoHS compatible) and free of halogen substances. If you have additional comments or questions, please contact your SGMICRO representative directly.

ABSOLUTE MAXIMUM RATINGS

V_+ to GND ..... 0V to 4.6V
Analog, Digital Voltage Range ..... -0.3V to (V_+) + 0.3V
Continuous Current HSDn or Dn ..... ±100mA
Peak Current HSDn or Dn ..... ±150mA
Junction Temperature ..... +150℃
Storage Temperature Range ..... -65℃ to +150℃
Lead Temperature (Soldering, 10s) ..... +260℃
ESD Susceptibility
HBM 8000V
MM 400V

RECOMMENDED OPERATING CONDITIONS

Operating Temperature Range ..... -40℃ to +85℃

OVERSTRESS CAUTION

Stresses beyond those listed in Absolute Maximum Ratings may cause permanent damage to the device. Exposure to absolute maximum rating conditions for extended periods may affect reliability. Functional operation of the device at any conditions beyond those indicated in the Recommended Operating Conditions section is not implied.

ESD SENSITIVITY CAUTION

This integrated circuit can be damaged by ESD if you don't pay attention to ESD protection. SGMICRO recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage. ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

DISCLAIMER

SG Micro Corp reserves the right to make any change in circuit design, or specifications without prior notice.

APPLICATION NOTES

Meeting USB 2.0 V_{BUS} Short Requirements

In section 7.1.1 of the USB 2.0 specification, it notes that USB devices must be able to withstand a V_{BUS} short to D+ or D- when the USB devices is either powered off or powered on. The SGM7222 can be successfully configured to meet both these requirements.

Power-Off Protection

For a V_{BUS} short circuit the switch is expected to withstand such a condition for at least 24 hours. The SGM7222 has specially designed circuitry which prevents unintended signal bleed through as well as guaranteed system reliability during a power-down, over-voltage condition. The protection has been added to the common pins (D+, D-).

Power-On Protection

The USB 2.0 specification also notes that the USB device should be capable of withstanding a V_{BUS} short during transmission of data. This modification works by limiting current flow back into the V_+ rail during the over-voltage event so current remains within the safe operating range. In this application, the switch passes the full 5.25V input signal through to the selected output, while maintaining specified off isolation on the un-selected pins.

SGM7222 USB2.0 Signal Quality Compliance Tests

Figures 1 and 2 show the test results for USB eye diagram tests. A summary of the USB tests is provided in Table 1. The SGM7222 passes the high speed signal quality, eye diagram and jitter tests.
