Lead Free Package and Finish

R_{DS(ON)}(Typ.)

0.34Ω

TO-220F

Packages Not to Scale

Super-Junction MOSFET

Applications:

- Adaptor
- Charger
- •SMPS

Features:

- RoHS Compliant
- . Low ON Resistance
- •Low Gate Charge
- •Peak Current vs Pulse Width Curve
- Inductive Switching Curves

Disclaimers:

InPower Semiconductor Co., Ltd (IPS) reserves the right to make changes without notice in order to improve reliability, function or design and to discontinue any product or service without notice. Customers should obtain the latest relevant information before orders and should verify that such information is current and complete. All products are sold subject to IPS's terms and conditions supplied at the time of order acknowledgement.

InPower Semiconductor Co., Ltd warrants performance of its hardware products to the specifications at the time of sale, Testing reliability and quality control are used to the extent IPS deems necessary to support this warrantee. Except where agreed upon by contractual agreement, testing of all parameters of each product is not necessarily performed.

InPower Semiconductor Co., Ltd does not assume any liability arising from the use of any product or circuit designs described herein. Customers are responsible for their products and applications using IPS's components. To minimize risk, customers must provide adequate design and operating safeguards.

InPower Semiconductor Co., Ltd does not warrant or convey any license either expressed or implied under its patent rights, nor the rights of others. Reproduction of information in IPS's data sheets or data books is permissible only if reproduction is without modification or alteration. Reproduction of this information with any alteration is an unfair and deceptive business practice. InPower Semiconductor Co., Ltd is not responsible or liable for such altered documentation.

Resale of IPS's products with statements different from or beyond the parameters stated by InPower Semiconductor Co., Ltd for that product or service voids all express or implied warrantees for the associated IPS's product or service and is unfair and deceptive business practice. InPower Semiconductor Co., Ltd is not responsible or liable for any such statements.

Life Support Policy:

InPower Semiconductor Co., Ltd's products are not authorized for use as critical components in life support devices or systems without the expressed written approval of InPower Semiconductor Co., Ltd.

As used herein:

- 1. Life support devices or systems are devices or systems which:
 - a. are intended for surgical implant into the human body,
 - b. support or sustain life,
 - c. whose failure to perform when properly used in accordance with instructions for used provided in the labeling, can be reasonably expected to result in significant injury to the user.

2. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
