**SKiIP® 2**

## 2-pack - integrated intelligent Power System

## Power section

**SKiiP 792GB170-373CTV**

## Features

- SKiiP technology inside
- Low loss IGBTs
- CAL diode technology
- Integrated current sensor
- Integrated temperature sensor
- Integrated heat sink
- IEC 60721-3-3 (humidity) class 3K3/IE32 (SKiiP® 2 System)
- IEC 68T.1 (climate) 40/125/56 (SKiiP® 2 power section)

- 1) with assembly of suitable MKP capacitor per terminal (SEMIKRON type is recommended)
- 8) AC connection busbars must be connected by the user; copper busbars available on request

SKiiP® 2

## 2-pack - integrated intelligent Power System

2-pack  
integrated gate driver

SKiiP 792GB170-373CTV

### Gate driver features

- CMOS compatible inputs
- Wide range power supply
- Integrated circuitry to sense phase current, heat sink temperature and DC-bus voltage (option)
- Short circuit protection
- Over current protection
- Over voltage protection (option)
- Power supply protected against under voltage
- Interlock of top/bottom switch
- Isolation by transformers
- Fibre optic interface (option for GB-types only)
- IEC 68T.1 (climate) 25/85/56 (SKiiP® 2 gate driver)

| $I_{Vs1outmax}$ | output current at pin 12/14                                                                | 50                                               |      |                          | mA         |
| $I_{A0max}$     | logic low output voltage                                                                   | 5                                                |      |                          | mA         |
| $V_{0L}$        | logic low output voltage                                                                   | 0,6                                              |      |                          | V          |
| $V_{0H}$        | logic high output voltage                                                                  | 30                                               |      |                          | V          |
| $I_{TRIPSC}$    | over current trip level (I <sub>analog OUT</sub> = 10 V)                                   | 938                                              |      |                          | A          |
| $I_{TRIPLG}$    | ground fault protection                                                                    |                                                  |      |                          | A          |
| $T_{tp}$        | over temperature protection                                                                | 110                                              |      |                          | °C         |
| $U_{DCTRIPO}$   | trip level of U <sub>DC</sub> -protection ( U <sub>analog OUT</sub> = 9 V); (option)       | 1200                                             |      |                          | V          |
