

#### **OVERVIEW**

The SM8142B is a transformer-less electroluminescent (EL) driver IC, capable of driving sheets up to 30cm<sup>2</sup> in size. It employs a high-efficiency driver output circuit configuration to control power dissipation. It is available in ultra-small 8-pin SON (Small Outline Non-leaded) packages\*, making possible the construction of small, thin, low-power driver units.

\*: SM8142BD

#### **FEATURES**

- Dedicated EL driver
- Noise-less smooth drive waveform
- High-efficiency output circuit
- Stand-by function
- Stable temperature characteristics
- Ultra-small package
- 1.6 to 5.5V supply voltage
- 0.3mA typ. (V<sub>DD</sub>=3.0V) current consumption (excluding coil current)
- 200V<sub>P-P</sub> maximum EL driver voltage
- 31 to 1000Hz EL driver frequency range
- 220µH minimum coil inductance

#### ORDERING INFORMATION

| Device   | Package    |  |  |
|----------|------------|--|--|
| SM8142BD | 8 pin SON  |  |  |
| SM8142BV | 8 pin VSOP |  |  |

## PACKAGE DIMENSIONS (Unit: mm)

■ 8-pin SON

■ 8-pin VSOP

## **SPECIFICATIONS**

# **Absolute Maximum Ratings**

| Parameter                 | Symbol              | Condition      | Rating                         | Unit |
|---------------------------|---------------------|----------------|--------------------------------|------|
| Supply voltage range      | $V_{DD}$            |                | -0.3 to 7.0                    | V    |
| Input voltage range       | V <sub>IN</sub>     | All input pins | $V_{SS}$ -0.3 to $V_{DD}$ +0.3 | V    |
| Output voltage(CHV)       | $V_{CHV}$           | CHV pin        | 0.5 to 120                     | V    |
| Output voltage(LDR)       | $V_{LDR}$           | LDR pin        | 0.5 to 120                     | V    |
| Output voltage(OUT1/2)    | V <sub>OUT1/2</sub> | OUT1,OUT2 pin  | 0.5 to 120                     | V    |
| Power dissipation         | $P_{D}$             | Ta≤85°C        | 100                            | mW   |
| Storage temperature range | $T_{STG}$           |                | -55 to +125                    | °C   |

Note. The device may be damaged or deteriorated if any of the above parameter ratings is exceeded.

# **Recommended Operating Conditions**

| Parameter                | Symbol                     | Condition             |                            |       | Unit |       |                        |

<sup>\*1.</sup> Output frequency=(1/256)×Inductance driver frequency

<sup>\*2.</sup> Rise time

## **TYPICAL APPLICATIONS**

(1) EL sheet size : 20 to 30cm<sup>2</sup> Current consumption : 20mA

(2) EL sheet size : 30 to 50cm<sup>2\*2</sup> Current consumption : 40mA

(3) EL sheet size : 10 to 15cm<sup>2</sup> Current consumption : 20mA

(4) EL sheet size : 10 to 20cm<sup>2</sup> Current consumption : 26mA

(5) EL sheet size : 30 to 50 cm<sup>2 \*2</sup> Current consumption : 34mA

- \*1. Do not operate the IC with the EL sheet NOT connected (no load to OUT1/OUT2) since the IC will be damaged.
- \*2. If the EL sheet size is exceeded  $30\text{cm}^2$ , connect a  $1.0\text{k}\Omega$  resistor between the EL sheet and the OUT1 pin.
- \*3. When the supply voltage is exceeded 4.0V, connect a  $20k\Omega$  resistor to CHV for current limit, and the OUT1 pin resistor is set  $1.0k\Omega$  (EL sheet size> $30cm^2$ ) or  $1.0k\Omega$  or less (EL sheet size< $30cm^2$ ).

Please pay your attention to the following points at time of using the products shown in this document.

- 1. The products shown in this document (hereinafter "Products") are designed and manufactured to the generally accepted standards of reliability as expected for use in general electronic and electrical equipment, such as personal equipment, machine tools and measurement equipment. The Products are not designed and manufactured to be used in any other special equipment requiring extremely high level of reliability and safety, such as aerospace equipment, nuclear power control equipment, medical equipment, transportation equipment, disaster prevention equipment, security equipment. The Products are not designed and manufactured to be used for the apparatus that exerts harmful influence on the human lives due to the defects, failure or malfunction of the Products. If you wish to use the Products in that apparatus, please contact our sales section in advance.
  In the event that the Products are used in such apparatus without our prior approval, we assume no responsibility whatsoever for any
  - In the event that the Products are used in such apparatus without our prior approval, we assume no responsibility whatsoever for any damages resulting from the use of that apparatus.
- 2. NPC reserves the right to change the specifications of the Products in order to improve the characteristics or reliability thereof.
- 3. The information described in this document is presented only as a guide for using the Products. No responsibility is assumed by us for any infringements of patents or other rights of the third parties which may result from its use. No license is granted by implication or otherwise under any patents or other rights of the third parties. Then, we assume no responsibility whatsoever for any damages resulting from that infringements.
- 4. The constant of each circuit shown in this document is described as an example, and it is not guaranteed about its value of the mass production products.
- 5. In the case of that the Products in this document falls under the foreign exchange and foreign trade control law or other applicable laws and regulations, approval of the export to be based on those laws and regulations are necessary. Customers are requested appropriately take steps to obtain required permissions or approvals from appropriate government agencies.
