SLDS034 − DECEMBER 1986 − REVISED JULY 1889

- **Each Device Drives 32 Lines**
- **180-V Open-Drain Parallel Outputs**
- **220-mA Parallel Output Sink Current Capability**
- **CMOS-Compatible Inputs**
- **Strobe Input Provided**
- **Serial Data Output for Cascade Operation**
- **Inputs Have Built-In Electrostatic Discharge Protection**

description

The SN751506 and the SN751516 are monolithic integrated circuits designed to drive the scan lines of a dc plasma panel display. The SN751516 pin sequence is reversed from the SN751506 for ease in printed-circuit-board layout.

Each device consists of a 32-bit shift register and 32 OR gates. Serial data is entered into the shift register on the high-to-low transition of the clock input. When STROBE is low, all Q outputs are in the off state. Outputs are open-drain JFET transistors with a breakdown voltage in excess of 180 V. The outputs have a 220-mA sink current capability in the on state. Only one Q output should be allowed to be in the on state at a time.

SERIAL OUT from the shift register can be used to cascade shift registers. This output is not affected by the STROBE input. All inputs are CMOS compatible with ESD protection built in.

The SN751506 and SN751516 are characterized for operation from 0°C to 70°C.

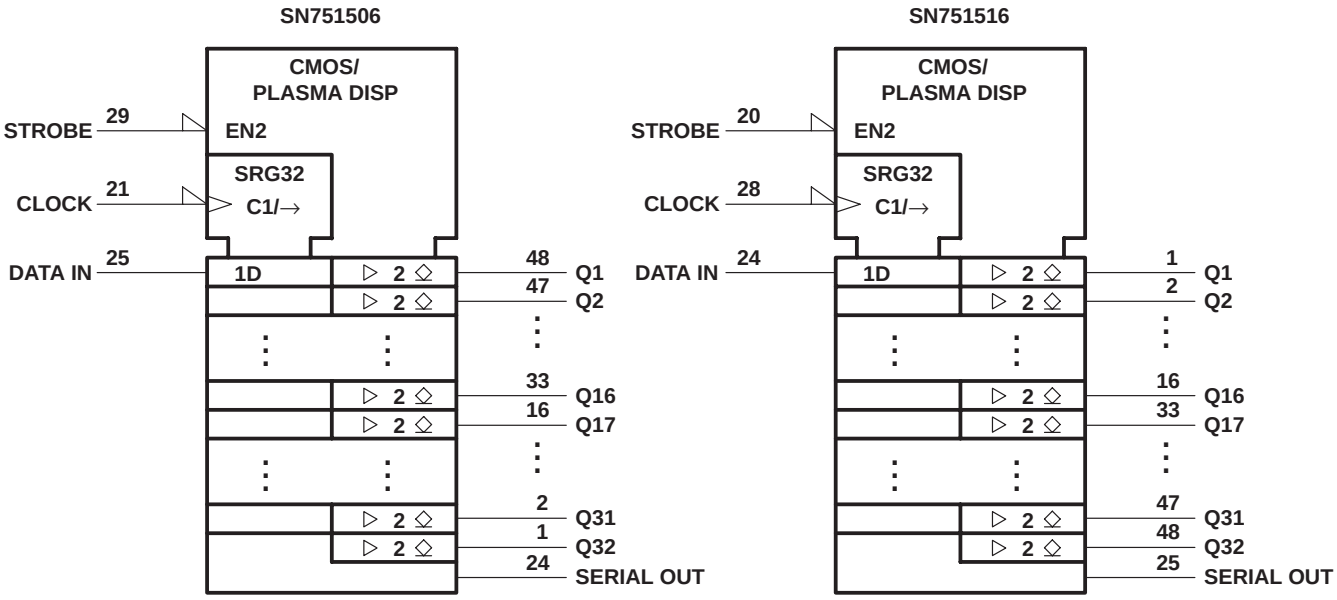
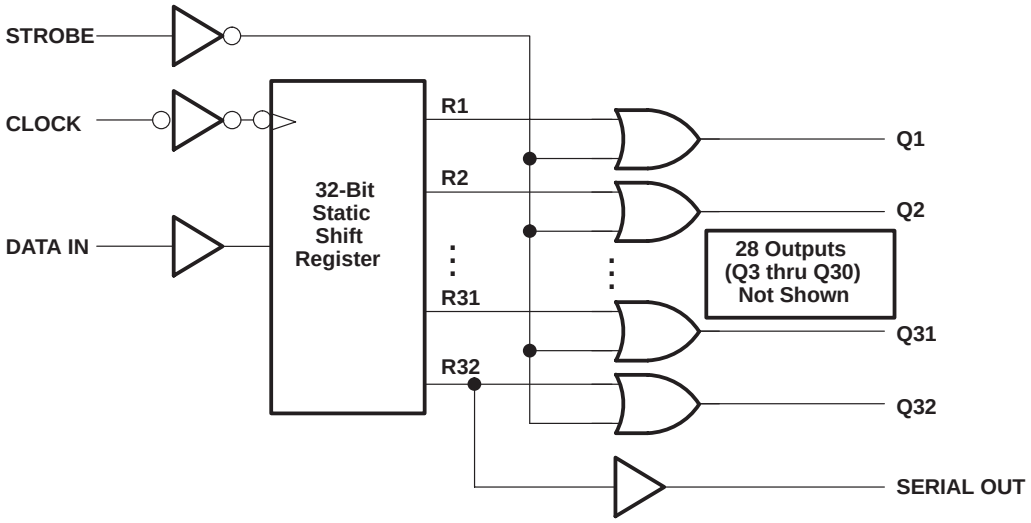
NC − No internal connection

logic symbols†



† These symbols are in accordance with ANSI/IEEE Std 91-1984 and IEC Publication 617-12.

logic diagram (positive logic)



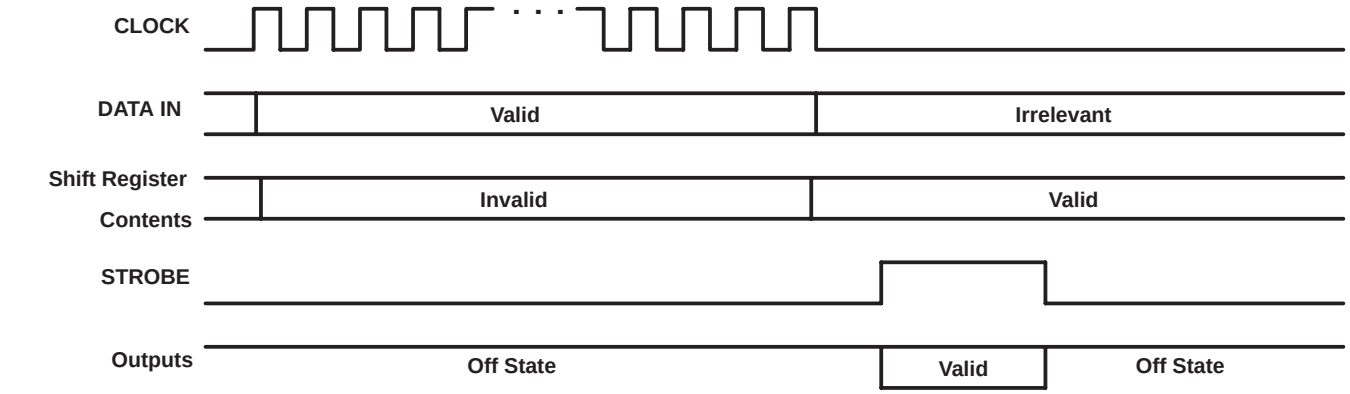
FUNCTION TABLE

FUNCTION	CONTROL INPUTS		SHIFT REGISTERS R1 THRU R32	OUTPUTS	
	CLOCK	STROBE		SERIAL	QI THRU Q32
Load	↓	X	Load and shift‡	R32	Determined by STROBE
	No ↓	X	No change	R32	
Strobe	X	L	As determined above	R32	All high impedance
	X	H		R32	R1 through R32

H = high level, L = low level, X = irrelevant, ↓= high-to-low transition.

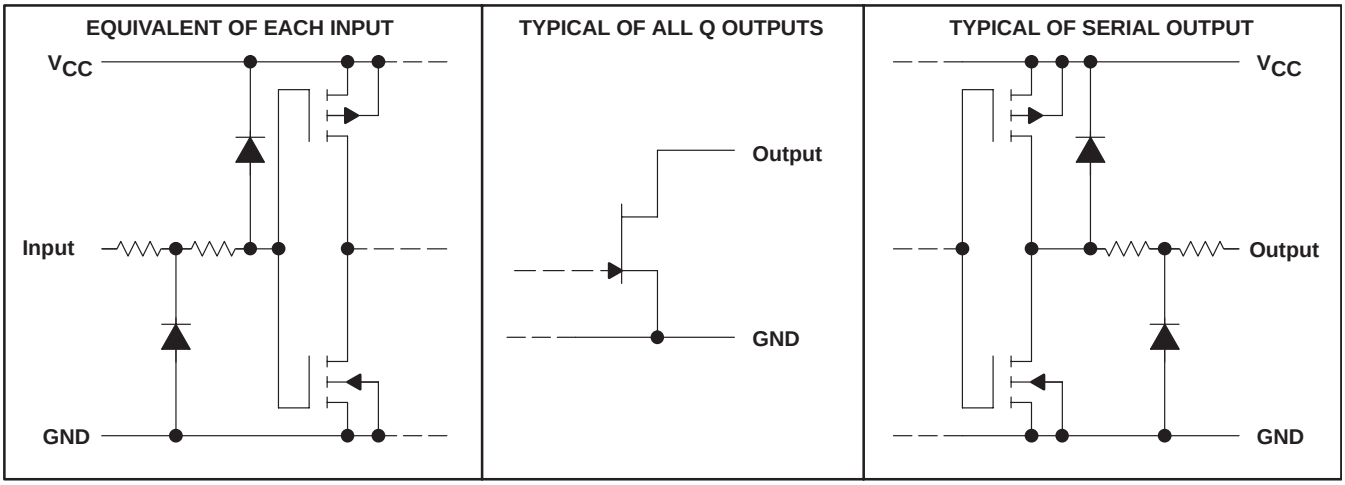
‡ R32 takes on the state of R31, R31 takes on the state of R30, . . . R2 takes on the state of R1, and R1 takes on the state of the data input.

typical operating sequence



† Only 1 bit in 32 should be low in the input data.

schematics of inputs and outputs



absolute maximum ratings over operating free-air temperature range (unless otherwise noted)

Supply voltage range, V_{CC} (see Note 1) . . . . . −0.4 V to 7 V
On-state Q output voltage range, V_O . . . . . −0.4 V to 125 V
Off-state Q output voltage range, V_O . . . . . −0.4 V to 180 V
Input voltage range, V_I . . . . . −0.4 V to V_{CC} + 0.4 V
Serial output voltage range . . . . . −0.4 V to V_{CC} + 0.4 V
Q output on-state time duration (see Note 2) . . . . . 100 µs
Q output duty cycle (see Note 2) 1/200
Continuous total power dissipation at (or below) 25°C free-air temperature (see Note 3) . . . . . 1025 mW
Operating free-air temperature range, T_A . . . . . 0°C to 70°C
Storage temperature range . . . . . −55°C to 150°C
Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds . . . . . 260°C

NOTES: 1. Voltage values are with respect to GND.
2. Only one Q output should be on at a time.
3. For operation above 25°C free-air temperature, derate linearly to 656 mW at 70°C at the rate of 8.2 mW/°C.

recommended operating conditions

		MIN	NOM	MAX	UNIT
Supply voltage, V_{CC}		4	5	6	V
Peak on-state Q output voltage, $V_{O(on)}$				110	V
High-level input voltage, V_{IH}	V_{CC} = 4 V	3.2			V
	V_{CC} = 6 V	4.8			
Low-level input voltage, V_{IL}	V_{CC} = 4 V			0.8	V
	V_{CC} = 6 V			1.2	
Output current, I_O (T_A = 25°C)				220	mA
Clock frequency, f_{clock}				200	kHz
Pulse duration, CLOCK high or low, $t_{w(CLK)}$		1.5†			µs
Pulse duration, DATA, t_{wD}		5			µs
Pulse duration, STROBE, $t_{w(STRB)}$		2			µs
Setup time, DATA IN before CLOCK ↓, t_{su}		1			µs
Hold time, DATA IN after CLOCK↓, t_h		1.2			µs
Operating free-air temperature, T_A		0		70	°C

† The minimum clock period is 5 µs.

electrical characteristics, V_{CC} = 5 V, T_A = 25°C

PARAMETER			TEST CONDITIONS	MIN	TYP	MAX	UNIT
V_{OH}	High-level output voltage	SERIAL OUT	I_{OH} = −0.1 mA	4.5			V
V_{OL}	Low-level output voltage	Q outputs	I_{OL}= 180 mA		6	10	V
		SERIAL OUT	I_{OL}= 0.1 mA			0.5	
$I_{O(off)}$	Off-state output current	Q outputs	V_{OH} = 110 V			1	µA
I_{OL}	Low-level output current	Q outputs	V_{OL} = 16 V	220			mA
I_{IH}	High-level input current		V_I = V_{CC}			1	µA
I_{IL}	Low-level input current		V_I = 0			−1	µA
C_i	Input capacitance					15	pF
I_{CC}	Supply current		All Q outputs off			1	mA
			One Q output on		20	40	

switching characteristics, V_{CC} = 5 V, T_A = 25°C

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
t_{pd}	Propagation delay time, CLOCK to SERIAL OUT	C_L = 15 pF		0.2	0.5	µs
t_{DHL}	Delay time, high-to-low-level Q output from STROBE or CLOCK inputs	C_L = 150 pF, R_L = 470 Ω, See Figures 2 and 3		0.2‡	0.6	µs
t_{DLH}	Delay time, low-to-high-level Q output from STROBE or CLOCK inputs			0.35‡	1	µs
t_{THL}	Transition time, high-to-low-level Q output			0.1	0.3	µs
t_{TLH}	Transition time, low-to-high-level Q output			0.35	1	µs

‡ Typical values are for clock Inputs. Typical values from STROBE will be less.

PARAMETER MEASUREMENT INFORMATION

NOTES: A. Input pulses are supplied by generators having the following characteristics: t_W = 1.25 µs, PRR ≤ 200 kHz, t_r ≤ 30 ns, t_f ≤ 30 ns, Z_O = 50 Ω.
B. C_L includes probe and jig capacitance.

PACKAGING INFORMATION

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead/Ball Finish	MSL Peak Temp (3)
SN751506FT	OBSOLETE	DFP	FT	48		TBD	Call TI	Call TI
SN751516FT	OBSOLETE	DFP	FT	48		TBD	Call TI	Call TI
SN751516FT	OBSOLETE	DFP	FT	48		TBD	Call TI	Call TI

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS) or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.
Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

C. Contact field sales office to determine if a tighter coplanarity requirement is available for this package.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
