SPE0588

Ultra Low Capacitance Single-Line ESD Protection Array

DESCRIPTION

The SPE0588 is an ESD transient voltage suppression component which provides a very high level of protection for sensitive electronic components that may be subjected to electrostatic discharge (ESD).
It is particularly well-suited for cellular phones, portable device, digital cameras, power supplies and many other portable applications because of its small package and low weight. The SPE0588 is Uni-directional, Safely dissipate ESD strikes of Level 4, IEC61000-4-2, exceeding the maximum requirement. Using the MILSTD-883 (Method 3015) specification for Human Body Model (HBM) ESD, the device provides protection for contact discharges to greater than +/-10KV.
The SPE0588 is available in a SOD-523 package with peak reverse working voltage of 5 voltages.
