STD878
STN878

High current, high performance, low voltage NPN transistors

Features

- Very low collector to emitter saturation voltage
- DC current gain, h_{FE} >100
- 5 A continuous collector current

Applications

- Power management in portable equipment
- Voltage regulation in bias supply circuits
- Switching regulator in battery charger applications
- Heavy load driver

Description

The devices are manufactured in low voltage NPN planar technology with “base island” layout. the resulting transistor shows exceptional high gain performance coupled with very low saturation voltage.
