Thick Film Hybrid IC

STK4030II

AF Power Amplifier (Split Power Supply) (35W min, THD = 0.4%)

Features

- Small-sized package permitting audio sets to be made slimmer
- The STK4024II series are available for output 20W to 70W and are pin-compatible.
- Facilitates thermal design of slim stereo sets.
- The use of a constant-current circuit minimizes pop noise at the time of power ON/OFF.
- Possible to design electronic supplementary circuits (pop noise muting at the time of power ON/OFF, load short protector, thermal shutdown)

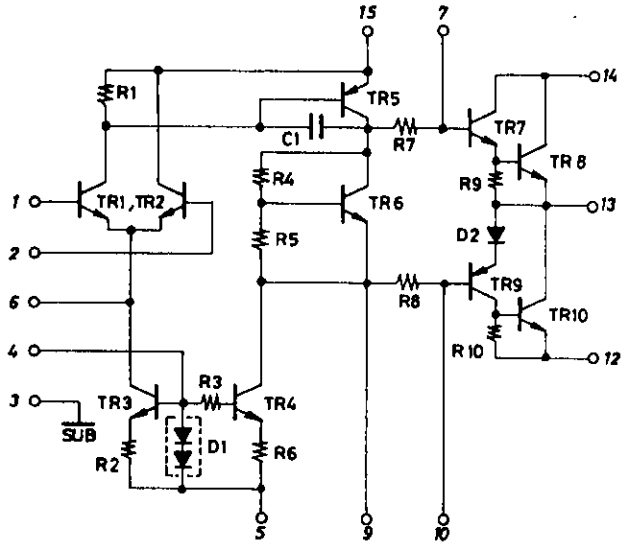
Equivalent Circuit



Note : For Power supply at the time of test, use a constant-voltage power supply unless otherwise specified.

* For measurement of the available time for load short-circuit and output noise voltage, use the specified transformer power supply shown below.

** The output noise voltage is represented by the peak value on rms scale (VTVM) of average value indicating type. The noise voltage waveform includes no flicker noise.
