

### GENERAL DESCRIPTION

The TL431 is a three-terminal adjustable regulator series with a guaranteed thermal stability over applicable temperature ranges. The output voltage may be set to any value between  $V_{ref}$  (approximately 2.495 volts) and 40 volts with two external resistors. These devices have a typical dynamic output impedance of  $0.2\Omega$ . Active output circuitry provides a very sharp turn-on characteristic making these devices excellent replacement for zener diodes in many applications. The TL431 is characterized for operation from  $-40^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$ .

TO-92

SOT-23

### FEATURES

- ◆ Programmable output voltage to 36V
- ◆ Low dynamic output Impedance  $0.2\Omega$ .
- ◆ Sink current capability of 1 mA to 100 mA.
- ◆ Equivalent full-range temperature coefficient of  $50 \text{ ppm}/^{\circ}\text{C}$
- ◆ Temperature compensated for operation over full Rated operating Temperature Range
- ◆ Low output noise voltage .
- ◆ Fast turn on respons.
- ◆ Provided pb-free packages.
- ◆ ESD tolerance (human body model) 2000V.
- ◆ Package outline: TO-92, SOT-23.
