PRODUCT PREVIEW

description

The TM2EJ64DPN is a 16M-byte, 144-pin, small outline dual-in-line memory module (SODIMM). The SODIMM is composed of eight TMS427809A, 2097152 × 8-bit 2K-refresh EDO dynamic random-access memories (DRAMs), each in a 400-mil, 28-pin plastic thin small-outline package (TSOP) (DGC suffix) mounted on a substrate with decoupling capacitors. See the TMS427809A data sheet (literature number SMKS894).

The TM2EJ64EPN is an 16M-byte, 144-pin SODIMM. The SODIMM is composed of eight TMS426809A, 2097152 × 8-bit 4K-refresh EDO DRAMs, each in a 400-mil, 28-pin plastic TSOP (DGC suffix) mounted on a substrate with decoupling capacitors. See the TMS426809A data sheet (literature number SMKS894).

The TM2FJ64DPN is a 16M-byte, 144-pin SODIMM. The SODIMM is composed of eight TMS427809AP, 2097152 × 8-bit 2K low-power battery-backup refresh EDO DRAMs, each in a 400-mil, 28-pin plastic TSOP (DGC suffix) mounted on a substrate with decoupling capacitors. See the TMS427809AP data sheet (literature number SMKS894).

The TM2FJ64EPN is a 16M-byte, 144-pin SODIMM. The SODIMM is composed of eight TMS426809AP, 2097152 × 8-bit 4K low-power battery-backup refresh EDO DRAMs, each in a 400-mil, 28-pin plastic TSOP (DGC suffix) mounted on a substrate with decoupling capacitors. See the TMS426809AP data sheet (literature number SMKS894).

operation

The TM2xJ64xPN operates as eight TMS42x809A/Ps, connected as shown in the functional block diagram.

PRODUCT PREVIEW

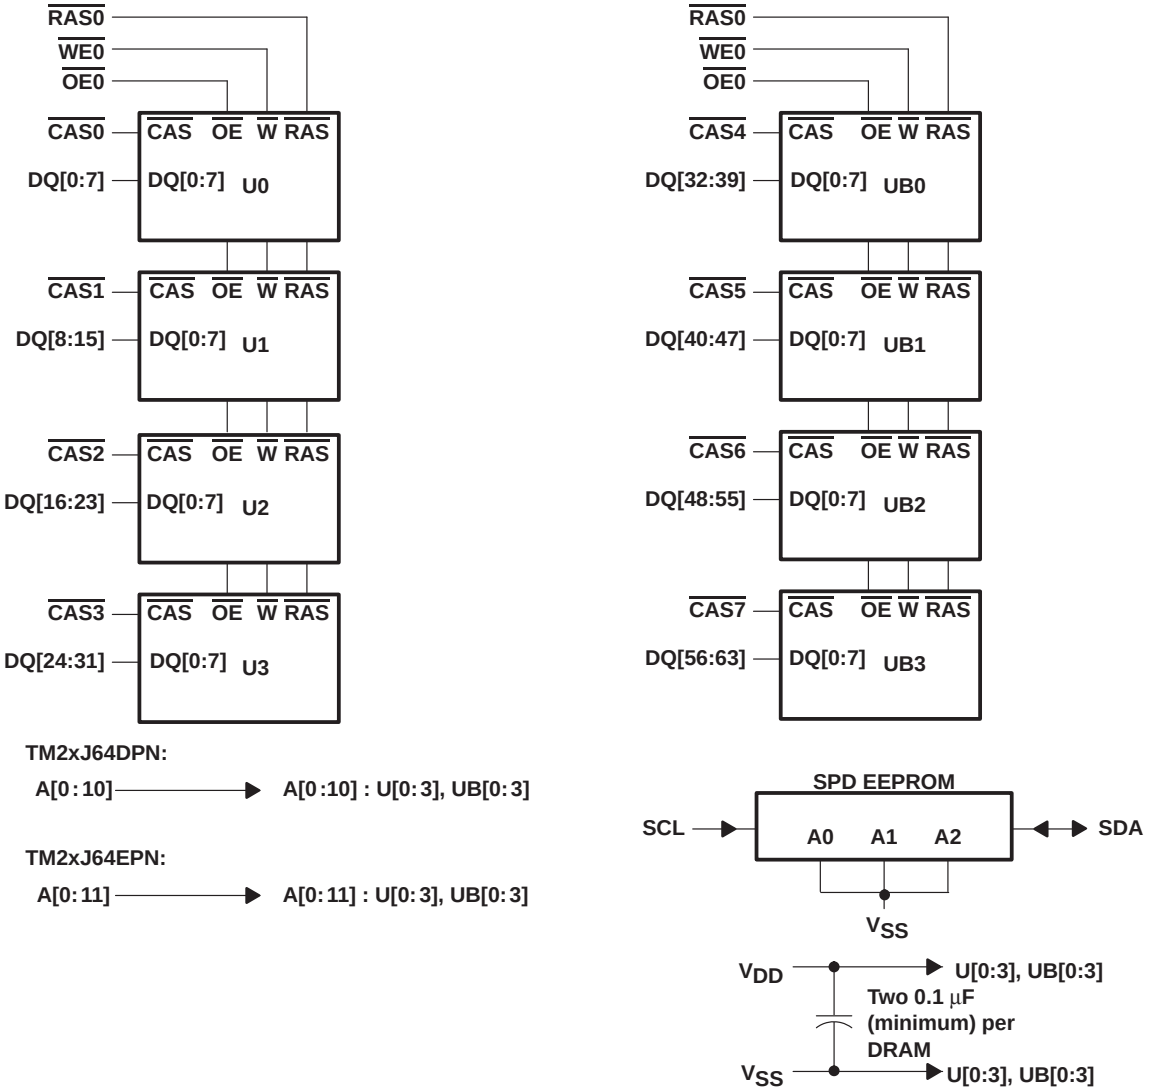
small outline dual-in-line memory module and components

The small−outline dual-in-line memory module and components include:

- PC substrate: 1,10 ± 0,1 mm (0.04 inch) nominal thickness
- Bypass capacitors: Multilayer ceramic
- Contact area: Nickel plate and gold plate over copper

functional block diagram for the TM2xJ64xPN



absolute maximum ratings over ambient temperature range (unless otherwise noted)†

Supply voltage range, V_{DD} . . . . . −0.5 V to 4.6 V
Voltage range on any pin (see Note 1) . . . . . − 0.5 V to 4.6 V
Short-circuit output current . . . . . 50 mA
Power dissipation: TM2xP64DPN . . . . . 8 W
TM2xP64EPN . . . . . 8 W
Ambient temperature range, T_A . . . . . 0°C to 70°C
Storage temperature range, T_{stg} . . . . . − 55°C to 125°C

† Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTE 1: All voltage values are with respect to V_{SS}.

recommended operating conditions

		MIN	NOM	MAX	UNIT
V_{DD}	Supply voltage	3	3.3	3.6	V
V_{SS}	Supply voltage		0		V
V_{IH}	High-level input voltage	2		V_{DD} + 0.3	V
V_{IH-SPD}	High-level input voltage for the SPD device	2		5.5	V
V_{IL}	Low-level input voltage	−0.3		0.8	V
T_A	Ambient temperature	0		70	°C

capacitance over recommended ranges of supply voltage and ambient temperature, f = 1 MHz (see Note 2)

PARAMETER		’2xJ64xPN		UNIT
		MIN	MAX	
$C_{i(A)}$	Input capacitance, A0 − A10		42	pF
$C_{i(OE)}$	Input capacitance, $\overline{OE0}$		58	pF
$C_{i(CAS)}$	Input capacitance, $\overline{CASx}$		9	pF
$C_{i(RAS)}$	Input capacitance, $\overline{RAS0}$		58	pF
$C_{i(W)}$	Input capacitance, $\overline{WE0}$		58	pF
C_o	Output capacitance		9	pF
$C_{i/o(SDA)}$	Input/output capacitance, SDA input		9	pF
$C_{i(SPD)}$	Input capacitance, SA0, SA1, SA2, SCL inputs		7	pF

NOTE 2: V_{DD} = NOM supply voltage ±10%, and the bias on pins under test is 0 V.

t_{CSR}	Setup time, $\overline{CASx}$ referenced to $\overline{RAS0}$ (CBR refresh only)	5		5		5		ns
t_{CAH}	Hold time, column address	8		10		12		ns
t_{DH}	Hold time, data in (see Note 8)	8		10		12		ns
t_{RAH}	Hold time, row address	8		10		10		ns
t_{RCH}	Hold time, read command referenced to $\overline{CASx}$ (see Note 9)	0		0		0		ns
t_{RRH}	Hold time, read command referenced to $\overline{RAS0}$ (see Note 9)	0		0		0		ns
t_{WCH}	Hold time, write command during $\overline{CASx}$ active (early-write only)	8		10		12		ns
t_{ROH}	Hold time, $\overline{RAS0}$ referenced to $\overline{OE0}$	8		10		10		ns
t_{WRH}	Hold time, $\overline{WE0}$ high after $\overline{RAS0}$ low (CBR refresh only)	10		10		10		ns
t_{CHR}	Hold time, $\overline{CASx}$ referenced to $\overline{RAS0}$ (CBR refresh only)	10		10		10		ns
t_{OEH}	Hold time, $\overline{OE0}$ command	13		15		18		ns
t_{RHCP}	Hold time, $\overline{RAS0}$ active from $\overline{CASx}$ precharge	28		35		40		ns
t_{CHS}	Hold time, $\overline{CASx}$ referenced to $\overline{RAS0}$ (self refresh only)	− 50		− 50		− 50		ns
t_{AWD}	Delay time, column address to write command (read-write only)	42		49		57		ns
t_{CRP}	Delay time, $\overline{CASx}$ precharge to $\overline{RAS0}$	5		5		5		ns

NOTES: 3. With ac parameters, it is assumed that t_T = 2 ns.
6. In a read-write cycle, t_{RWD} and t_{RWL} must be observed.
7. During the period of 10 µs ≤ t_{RASS} ≤100 µs, the device is in a transition state from normal-operation mode to self-refresh mode.
8. Referenced to the later of $\overline{CASx}$ or $\overline{WE0}$ in write operations
9. Either t_{RRH} or t_{RCH} must be satisfied for a read cycle.

PRODUCT PREVIEW

serial presence detect

The serial presence detect (SPD) is contained in a 2K-bit serial EEPROM located on the module. The SPD nonvolatile EEPROM contains various data such as module configuration, DRAM organization, and timing parameters (see tables below). Only the first 128 bytes are programmed by Texas Instruments, while the remaining 128 bytes are available for customer use. Programming is done through an IIC bus using the clock (SCL) and data (SDA) signals. All Texas Instruments modules comply with the current JEDEC SPD Standard. See the *Texas Instruments Serial Presence Detect Technical Reference* (literature number SMMU001) for further details.

Tables in this section list the SPD contents as follows:

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
