description

The TM4SP64KPN is a 32M-byte, 168-pin dual-in-line memory module (DIMM). The DIMM is composed of four TMS664164ADGE, 4194304 x 16-bit SDRAMs, each in a 400-mil, 54-pin plastic thin small-outline package (TSOP) mounted on a substrate with decoupling capacitors. See the TMS664164A data sheet (literature number SMOS695).

The TM8SP64KPN is a 64M-byte, 168-pin DIMM. The DIMM is composed of eight TMS664164ADGE, 4194304 x 16-bit SDRAMs, each in a 400-mil, 54-pin plastic TSOP mounted on a substrate with decoupling capacitors. See the TMS664164A data sheet (literature number SMOS695).

operation

The TM4SP64KPN operates as four TMS664164ADGE devices that are connected as shown in the TM4SP64KPN functional block diagram. The TM8SP64KPN operates as eight TMS664164ADGE devices connected as shown in the TM8SP64KPN functional block diagram.

[†] All references are made to the rising transition of CK unless otherwise noted.

[‡] A CK cycle can be considered as contributing to a timing requirement for those parameters defined in cycle units only when not gated by CKE (those CK cycles occurring during the time when CKE is asserted low).

NOTES: 11. t_{AC} is referenced from the rising transition of CK that precedes the data-out cycle. For example, the first data out t_{AC} is referenced from the rising transition of CK that is read latency (one cycle after the READ command). Access time is measured at output reference level 1.4 V.

12. t_{LZ} is measured from the rising transition of CK that is read latency (one cycle after the READ command).

13. t_{HZ} (max) defines the time at which the outputs are no longer driven and is not referenced to output voltage levels.

14. For read or write operations with automatic deactivate, t_{RCD} must be set to satisfy minimum t_{RAS}.

serial presence detect

The serial presence detect (SPD) is contained in a 256-byte serial EEPROM located on the module. The SPD nonvolatile EEPROM contains various data such as module configuration, SDRAM organization, and timing parameters (see Table 1 and Table 2). Only the first 128 bytes are programmed by Texas Instruments, while the remaining 128 bytes are available for customer use. Programming is done through an IIC bus using the clock (SCL) and data (SDA) signals. All Texas Instruments modules comply with the current JEDEC SPD Standard. See the Texas Instruments *Serial Presence Detect Technical Reference* (literature number SMMU001) for further details.

Table 1 and Table 2 list the SPD contents as follows:

serial presence detect (continued)

Table 2. Serial Presence Detect Data for the TM8SP64KPN (Continued)

BYTE NO.	DESCRIPTION OF FUNCTION	TM8SP64KPN-10	
		ITEM	DATA
27	Minimum row precharge time	$t_{RP} = 30 \text{ ns}$	1Eh
28	Minimum row-active to row-active delay	$t_{RRD} = 20 \text{ ns}$	14h
29	Minimum $\overline{\text{RAS}}$ -to- $\overline{\text{CAS}}$ delay	$t_{RCD} = 30 \text{ ns}$	1Eh
30	Minimum $\overline{\text{RAS}}$ pulse width	$t_{RAS} = 50 \text{ ns}$	32h
31	Density of each bank on module	32M Bytes	08h
32	Command and address signal input setup time	$t_{IS} = 2 \text{ ns}$	20h
33	Command and address signal input hold time	$t_{IH} = 1 \text{ ns}$	10h
34	Data signal input setup time	$t_{IS} = 2 \text{ ns}$	20h
35	Data signal input hold time	$t_{IH} = 1 \text{ ns}$	10h
36–61	Superset features (may be used in the future)		
62	SPD revision	Rev. 1.2	12h
63	Checksum for byte 0–62	9	09h
64–71	Manufacturer's JEDEC ID code per JEP–106E	97h	9700...00h
72	Manufacturing location [†]	TBD	
73–90	Manufacturer's part number [†]	TBD	
91	Die revision code [†]	TBD	
92	PCB revision code [†]	TBD	
93–94	Manufacturing date [†]	TBD	
95–98	Assembly serial number [†]	TBD	
99–125	Manufacturer-specific data [†]	TBD	
126–127	Vendor-specific data [†]	TBD	
128–166	System-integrator-specific data [‡]	TBD	
167–255	Open		

[†] TBD indicates values are determined at manufacturing time and are module-dependent.

[‡] These TBD values are determined and programmed by the customer (optional).

DUAL IN-LINE MEMORY MODULE

- NOTES: A. All linear dimensions are in inches (millimeters).
 B. This drawing is subject to change without notice.
 C. Falls within JEDEC MO-161
 D. Dimension includes de-panelization variations; applies between notch and tab edge.
 E. Outline may vary above notches to allow router/panelization irregularities.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
