

TMR7559-C

Board Mount Precision Current Sensor

Description

TMR7559-C is a close loop current sensor for accurate measurement of DC, AC, pulsed current and arbitrary waveform current with galvanic isolation between primary and secondary circuits.

Features and Benefits

- High accuracy
- Excellent linearity
- Low temperature coefficient
- Fast response time
- Galvanic isolation
- RoHS & REACH compliant

Applications

- Solar inverter
- Direct-current dynamo
- Uninterruptible power supplies (UPS)
- Switched mode power supplies (SMPS)
- Variable frequency drive (VFD)

Selection Guide

Part Number	Primary Nominal Current	Primary Current Measuring Range
TMR7559-1000C	100 A	±300 A
TMR7559-1500C	150 A	±450 A
TMR7559-2000C	200 A	±500 A
TMR7559-2500C	250 A	±500 A

Insulation and Environmental Characteristics

Parameters	Symbol	Typ.	Unit
Dielectric Strength	V _D	4	kV(50 Hz, 1 min)
Insulation Resistance	R _{IS}	1000	MΩ
Creepage Distance	d _{CP}	22	mm
Clearance	d _{CL}	14.5	mm
Ambient Operating Temperature	T _A	-40 to +85	°C
Ambient Storage Temperature	T _{STG}	-50 to +105	°C
Mass	m	85	g

4. Parameters Definition and Formula

1) Output Voltage

$$V_{OUT} = V_{OFF} + S \times I_P$$

V_{OUT} stands for current sensor output voltage at given primary current, V_{OFF} stands for offset voltage, S stands for sensitivity, I_P stands for primary current.

2) Accuracy

$$X_G = \underset{I_P \in [-I_{PN}, I_{PN}]}{\text{MAX}} \left(\frac{(V_{OUT} - V_{REF}) - (S \times I_P)}{S \times I_{PN}} \times 100\% \right)$$

I_{PN} stands for nominal primary current

3) Sensitivity

$$S = \frac{V_{OUT}(@ I_{PN}) - V_{OUT}(@ -I_{PN})}{2 \times I_{PN}}$$

$V_{OUT}(@ I_{PN})$ and $V_{OUT}(@ -I_{PN})$ stand for the current output at I_{PN} and $-I_{PN}$ respectively.

4) Linearity

$$\varepsilon_L = \underset{I_P \in [-I_{PN}, I_{PN}]}{\text{MAX}} \left(\frac{(V_{OUT} - V_{REF}) - (\bar{V}_{OE} + \bar{S} \times I_P)}{S \times I_{PN}} \times 100\% \right)$$

\bar{S} and \bar{V}_{OE} stand for the average values of the sensitivity and electric offset.

5) Symmetry

$$\varepsilon_{SYM} = \left| \frac{V_{OUT}(@ I_{PN}) - \bar{V}_{OFF}}{V_{OUT}(@ -I_{PN}) - \bar{V}_{OFF}} \right| \times 100\%$$

6) Hysteresis

$$V_{OH} = \text{MAX } \Delta H$$

ΔH is the maximum residual output current between full scale positive and negative nominal current.

7) Offset Voltage

$$V_{OE} = V_{OUT}(@ I_P = 0) - V_{REF}$$

5. Dimensions

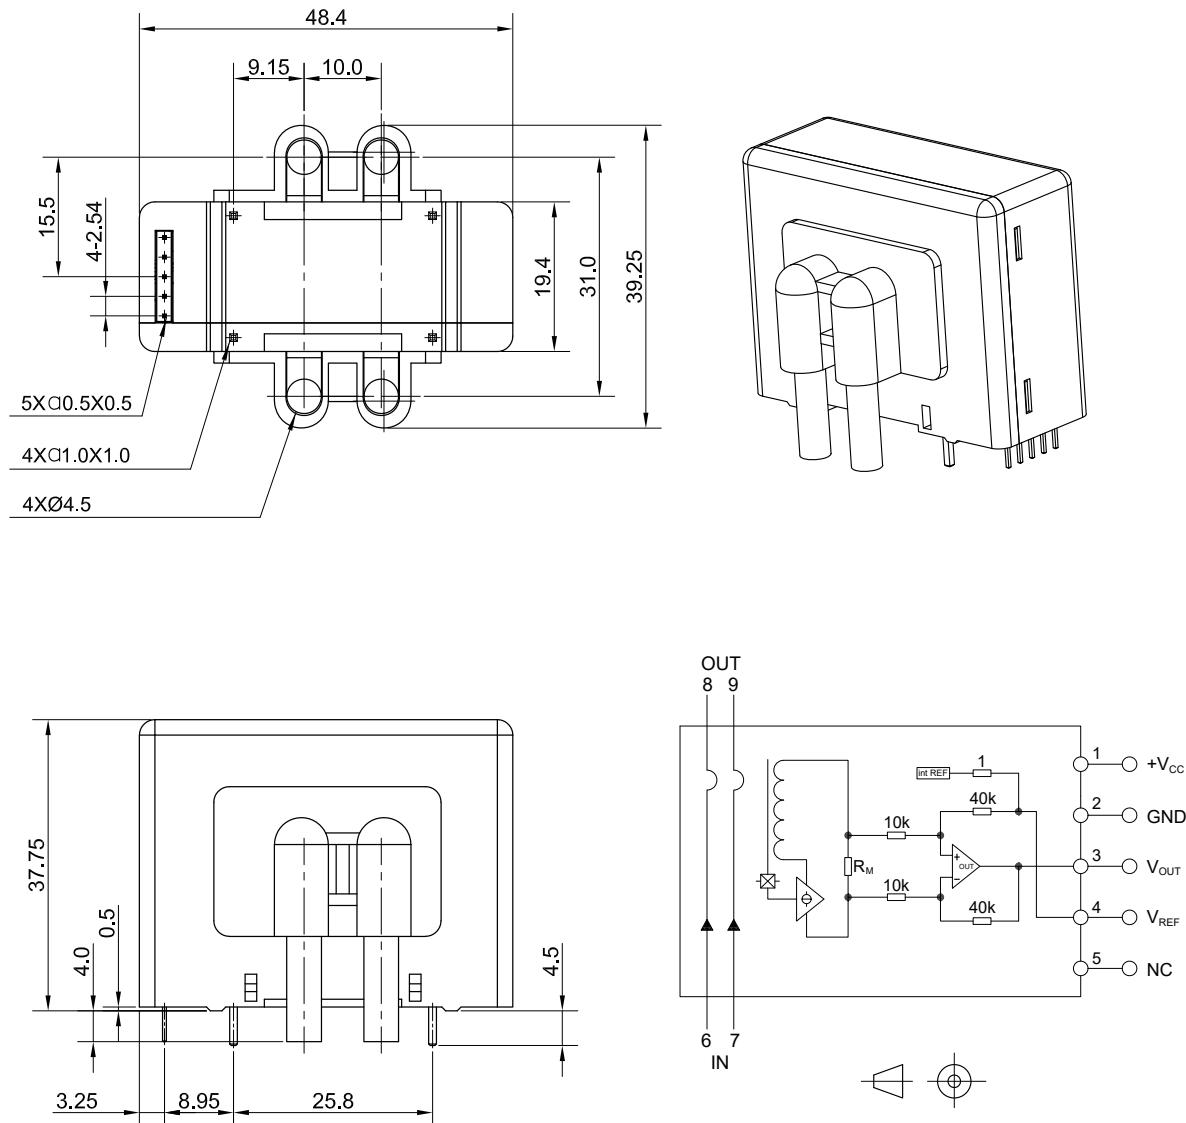

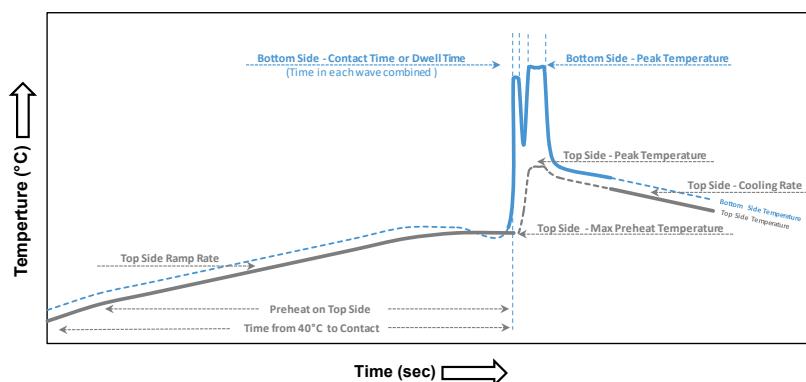

Figure 12. Dimension (unit: mm, tolerances for unmarked scales ± 1 mm)

6. Remarks

- 1) V_{OUT} is positive when the primary current (I_P) is in the same direction as the arrow indication on the label and vice versa.
- 2) Improper connection may result in permanent damage of the sensor.
- 3) Wave soldering profile max temperature should be set no higher than 260°C for 10s.
 - a) Preheating spec: 130~160 °C for 60~90s.
 - b) Component through hole legs dwell time in solder wave maximum 10s (Sn93.5 - Ag3.0 - Cu0.5).

- 4) Sensor is customizable upon request.

7. Recommended size of pad

Information furnished herein by MultiDimension Technology Co., Ltd. (hereinafter MDT) is believed to be accurate and reliable. However, MDT disclaims any and all warranties and liabilities of any kind, with respect to any examples, hints or any performance or use of technical data as described herein and/or any information regarding the application of the product, including without limitation warranties of non-infringement of intellectual property rights of any third party. This document neither conveys nor implies any license under patent or other industrial or intellectual property rights. Customer or any third-party must further determine the suitability of the MDT products for its applications to avoid the applications default of customer or third-party. MDT accept no liability in this respect.

MDT does not assume any liabilities of any indirect, incidental, punitive, special or consequential damages (including without limitation of lost profits, lost savings, business interruption, costs related to the removal or replacement of any products or rework charges) whether or not such damages are based on tort (including negligence), warranty, breach of contract or any other legal theory. Notwithstanding any damages that customer might incur for any reason whatsoever, MDT's aggregate and cumulative liability towards customer for the products described herein shall be limited in accordance with the terms and conditions of commercial sale of MDT.

Absolute maximum ratings are the extreme limits the device will withstand without damage to the MDT product. However, the electrical and mechanical characteristics are not guaranteed as the maximum limits (above recommended operating conditions) are approached. MDT disclaims any and all warranties and liabilities of the MDT product will operate at absolute maximum ratings.

Specifications may change without notice.
