

SE Series

When the surge energy much higher than the rated maximum energy is applied to the varistors, it may blow up and catch fire.

Our newly developed TNR SE series is to prevent from being caught fire even very high surge energy is applied.

Thus electric appliance using our TNR SE series can be much safer.

20SE221 TNR() WA IR

◆FEATURES

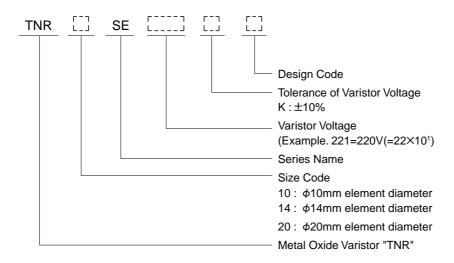

- •Newly developed non-flammable material (Harogen Free) is used for outer coating.
- ●The new outer coating will meet UL flammability test.
- •At the over voltage test, the new material shall deter burning caused by the high temperature, arc and the large surge current when TNR shall blow up.
- •General specifications are same as that of V series, large surge capability TNR.

◆APPLICATIONS

- •Protection for semiconductors from over voltage.
- Protection for electronic instruments from lightning surge.
- Absorption of on-off surge from motors and relays.

Operating Temperature Range: -40~+85℃ Storage Temperature Range: -50~+125℃

♦GENERAL SPECIFICATIONS

Operating Temperature Range: -40 \sim +85 $^{\circ}$ C Storage Temperature Range: -50 \sim +125 $^{\circ}$ C

Item	Test Conditions	Specifications
Standard Test	20±5℃, 65±20% RH unless specified.	
Condition	However, if it does not affect test result,	
	the condition can be 20±15°C, 65±20% RH also.	
Varistor Voltage	The voltage between the two terminals measured at 1mA DC is called Varistor Voltage.	Satisfy the specification
	The measurement shall be made as fast as possible to aviod heat effection.	
Maximum Allowable	Maximum continuous AC voltage (50~60Hz AC) and maximum DC voltage which can be	Satisfy the specification
Voltage	applided.	
Maximum Peak	Maximum surge current (8/20µSec. pulse wave to be applied once, or twice, 2 minute apart) for	Satisfy the specification
Surge Current	varistor voltage change within $\pm 10\%$ of the initial value.	
Energy Rating	Maximun energy (2mSec. square wave to be applied once) for varistor voltage change within	Satisfy the specification
	$\pm 10\%$ of the initial value.	
Rated Wattage	Maximum power (50~60Hz AC power to be applied for 1,000 hours at 85±2℃) for varistor	Satisfy the specification
	voltage change within $\pm 10\%$ of the initial value.	
Maximum Clamping	Maximum voltage across varistor when 8/20µSec. rated current surge is applied.	Satisfy the specification
Voltage		
Capacitance	Varistor's capacitance at 1kHz, standard test condition.	For reference only.
Voltage Temparature	$\frac{\text{V1mA at 85}^{\circ}\text{C} - \text{V1mA at 25}^{\circ}\text{C}}{\text{V1mA at 25}^{\circ}\text{C}} \times \frac{1}{60} \times 100 \text{ (%/C)}$	Within ±0.05%/℃
Coefficient	V1mA at 25℃	
	V1mA : Actual Varistor Voltage	
Insulation	Short circuit the two leads of varistor, and put the varistor body into lead balls (1.6mm	The varistor shall withstand
	diameter) leaving 2mm epoxy coating outside. Then, apply 2.5kVrms between the leads and	with no abnormality.
	the lead balls for 60±5 seconds.	

◆RELIABILITY CHARACTERISTICS

Item	Test Conditions	Specifications
Heat Cycle	Subject varistor to the following tempmrature cycles40°C for 30 minutes →Normal room	ΔV1mA ≦±5%
	temperature for 10 minutes → 85°C for 30 minutes → Normal room temperature for 10 minutes.	No appearance abnormality.
	This completes one cycle. The cycle shall be repeated 50 times total. After the cycles, the	
	varistor shall be stored at normal room temperature for one hour. Then check the varistor	
	voltage and the appearance.	
High Temperature	Store varistor at 125°C for 1,000 hours. After that, store the varistor at normal room	ΔV1mA ≦±5%
Exposure	temperature for one hour. Then check the varistor voltage.	
Humidity Resistivity	Store at 40C, 90~95% RH for 1,000 hours. After that, store the varistor at normal room	ΔV1mA ≦±5%
	temperature for one hour. Then cheek the varistor voltage.	
High Temperature	Apply maximum applied voltage to varistor at 85℃ for 1,000 hours. After that, store the varistor	ΔV1mA ≦±10%
Operation	at normal room temperature for one hour. Then check the varistor voltage.	

NIPPON CHEMI-CON METAL OXIDE VARISTORS TNR®

SE Series

◆MECHANICAL CHARACTERISTICS

Item	Test Conditions	Specifications
Soldering Heat	Store varistor at normal room temperature. Dip the varistor leads to solder, at 350±10℃ for	ΔV1mA ≦±5%
Resistivity	$3\pm\frac{1}{0}$ seconds, up to 2.0~2.5 mm from the varistor body. After that, store the varistor at	Vc : Actual varistor voltage
	normal room temperature for 30 miniutes, and measure the varistor voltage.	No mechanical damages
Solderability	Dip varistor leads to methanol solutin (JIS K 1501, about 25%) of rosin (JIS Z 5902) for 5~10	At least, 95% of the surface
	seconds. Then, dip the lead to solder (JIS Z 3282 H60A or H63A) at 225~240℃, up to 2.0~	dipped to solder shall be
	2.5mm from the varistor body for 5±0.5 seconds. Then, check the solderability.	coverd by new solder.
Lead Pull Strength	Fix varistor body, and suspend specified weight toward direction of lead axis.	No abnormality such as
	Lead diameter Force	disconnection.
	φ0.6mm, φ0.8mm 10 N	ΔV1mA ≦±5%
Lead Bend Strength	The varistor shall be secured with its terminal kept vertical and the force specified below shall	No remarkable damage as
	be applied in the axial direction.	remarkable the inner
	The terminal shall gradually be bend by 90 in one direction then back to original position.	ceramic element or
	The damage of the terminal shall be visually examined.	terminal open.
	Lead diameter Force	
	φ0.6mm, φ0.8mm 2.5 N	
Vibration Resistivity	Mount varistor body on vibrator, and conduct follwing vibration test.	No remarkable appearance
	Peak-to-Peak amplitude : 1.5mm	abnormality.
	Vibration frequency range : 10Hz∼55Hz	
	Sweeping time:	ΔV1mA ±5%
	Approximately one minute for 10Hz → 55Hz → 10Hz	
	Direction and duration of vibration :	
	Three directions of X, Y and Z. Two hours each.	
	Six hours total.	
Flammability test	The varistor shall be subjected to 60 second applications of test flame.	No catching fire, and no
		flaming drops.
	Burner : Bunsen gas burner 9000kcal / m³	
	Diameter of flame nozzle : φ9.5 mm	
	Position : The specimen shall be fixed horizontal.	
	Point of application shall be approximately center of the specimen.	

CAT. No. E1006K (5/5)
