

TPA4499 is a 1 :1 high impedance transformer with the following features.

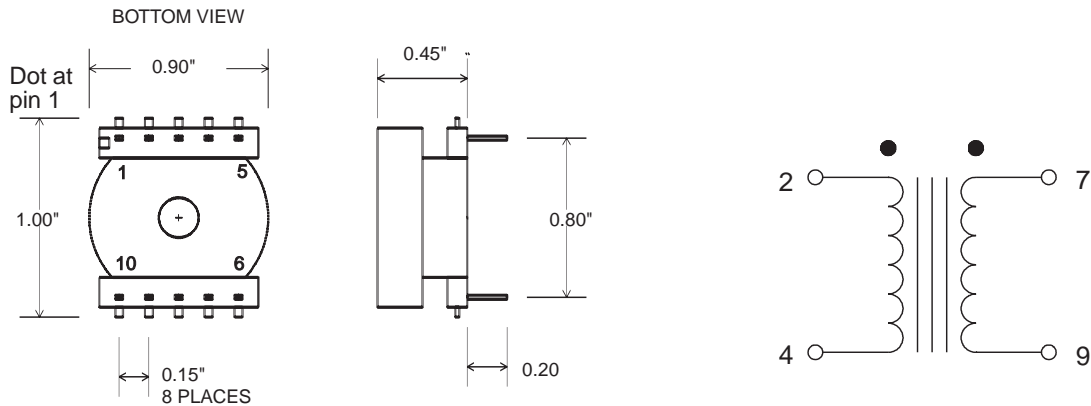

- Low profile.
- Conforming to FCC part 68 and CS 03 regulations.
- High inductance.
- Low bridging and insertion losses.
- Low cost.

Applications:

Bridging a telephone line with a high impedance where a low bridging loss is required.

## MECHANICAL

All dimensions are in inches

## ELECTRICAL

Frequency	300 - 3400 Hz	200 Hz - 3500 KHz
Inductance	> 3.0 H	
Longitudinal Balance	> 65 dB	200 - 3500 Hz
Turns Ratio	1 : 1	
Dielectric Strength	1000 Vrms	winding to winding & Windings to core

ISSUE: E 95/04/05 TPA4499
