

Low Quiescent Current, Dual-Channel Supervisory Circuit

FEATURES

- Two Supply Monitors in One Package
- One Monitor with Fixed High-Accuracy Thresholds for System Supply Monitoring
- Second Monitor with Variable Threshold and 30mV Hysteresis to Provide Failsafe
- Very Low Quiescent Current: 3.5µA typ
- High Threshold Accuracy: 1% max (0°C to +85°C)
- Open-Drain Reset Outputs
- Temperature Range: –40°C to +85°C
- Ultra-Small SC70-5 Package

APPLICATIONS

- DSP, Microcontroller, or Microprocessor Applications Requiring User-Selected Delay Times
- Notebook/Desktop Computers
- PDAs and SmartPhones
- Other Hand-Held Products
- Portable, Battery-Powered Products
- FPGA/ASIC Applications

DESCRIPTION

The TPS3807 family microprocessor supervisory circuits monitor system voltages as low as 1.225V. These devices assert an open-drain $\overline{\text{RSTVDD}}$ signal when the V_{DD} voltage drops below a preset threshold. The $\overline{\text{RSTVDD}}$ output remains asserted until the V_{DD} voltage returns above its threshold. The device also provides an additional $\overline{\text{RSTSENSE}}$ output for a SENSE input with adjustable thresholds and hysteresis.

The TPS3807 uses a precision reference to achieve 1% threshold accuracy. The TPS3807 has a very low typical quiescent current of 3.5µA, so it is well-suited to battery-powered applications. It is available in a small SC70-5 package, which is half the size of a SOT-23 package, and is fully specified over a temperature range of –40°C to +85°C.

Typical Application Circuit

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

All trademarks are the property of their respective owners.

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

ORDERING INFORMATION⁽¹⁾

PRODUCT	V _{DD} NEGATIVE THRESHOLD VOLTAGE (V _{DD IT-}) ⁽²⁾	V _{DD} POSITIVE THRESHOLD VOLTAGE (V _{DD IT+}) ⁽²⁾	SENSE THRESHOLD VOLTAGE (V _{SENSE IT})
TPS3807A30DCKT ⁽³⁾	3.00V	3.58V	1.225V
TPS3807A30DCKR ⁽⁴⁾	3.00V	3.58V	1.225V

- (1) For the most current package and ordering information, see the Package Option Addendum at the end of this document or see the TI web site at www.ti.com.
- (2) Other voltage options are available upon request; minimum order quantities may apply.
- (3) DCKT passive indicates tape and reel containing 250 parts.
- (4) The DCKR passive indicates tape and reel containing 3000 parts.

ABSOLUTE MAXIMUM RATINGS

Over operating free-air temperature range, unless otherwise noted.⁽¹⁾

SENSE pin voltage ⁽²⁾	-0.3V to +5V
\overline{MR}	-0.3V to V _{DD} +0.3V
RESET	-0.3V to V _{DD} +0.3V
All other pins ⁽²⁾	-0.3V to +7V
Maximum output current	±5mA
Input clamp current, I _{IK} (V _{SENSE} < 0 or V _{SENSE} > V _{DD})	±10mA
Output clamp current, I _{OK} (V _O < 0 or V _O > V _{DD})	±10mA
Continuous total power dissipation	See <i>Dissipation Ratings</i> table
Junction temperature, T _C	-40°C to +125°C
Storage temperature range, T _{STG}	-65°C to +150°C
Soldering temperature	+260°C
ESD rating:	
Human body model (HBM)	2kV
Charged device model (CDM)	500V

- (1) Stresses beyond those listed under *absolute maximum ratings* may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these conditions is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- (2) All voltage values are with respect to GND. For reliable operation, the device must not be continuously operated at 7V for more than t = 1000 hours.

DISSIPATION RATINGS

PACKAGE	θ _{JA}	DERATING FACTOR ABOVE T _A = +25°C	T _A < +25°C POWER RATING	T _A = +70°C POWER RATING	T _A = +80°C POWER RATING
DCK	+246°C/W	2.6mW/°C	406mW	223mW	167mW

RECOMMENDED OPERATING CONDITIONS

		MIN	MAX	UNIT
Supply voltage, V _{DD}		1.8	6.5	V
Input voltage, V _{SENSE}	0V ≤ V _{DD} ≤ 4.2V	0	V _{DD} + 0.3	V
	V _{DD} ≥ 4.2V		4.5	
Operating free-air temperature range, T _A		-40°C	+85°C	°C

ELECTRICAL CHARACTERISTICS

Over recommended operating temperature range, unless otherwise noted.

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
V_{DD}	Input supply range		1.8		6.5	V
I_{DD}	Supply current	$V_{DD} = 3.3V$ $\overline{RSTVDD}, \overline{RSTSENSE} = \text{open}$		3.5	6.5	μA
		$V_{DD} = 6.5V$ $\overline{RSTVDD}, \overline{RSTSENSE} = \text{open}$		4.5	7.5	μA
V_{OL}	Low-level output voltage	$V_{DD} = 1.3V, I_{OL} = 0.4mA$			0.3	V
		$V_{DD} = 1.8V, I_{OL} = 1mA$			0.4	
		$V_{DD} = 3.3V, I_{OL} = 2mA$			0.4	
	Power-up reset ⁽¹⁾	$V_{\overline{RSTVDD}}(\text{max}) = 0.2V,$ $I_{OL} = 30\mu A, +25^\circ C$	0.9			V
$V_{DD\ IT-}$	Negative-going input threshold voltage ⁽²⁾		2.963	3.000	3.037	V
$V_{DD\ IT+}$	Positive-going input threshold voltage ⁽²⁾		3.530	3.575	3.620	V
$V_{SENSE\ IT-}$	Negative-going input threshold voltage	0°C to +85°C	1.213	1.225	1.237	V
		-40°C to +85°C	1.210	1.225	1.240	
V_{HYS}	SENSE input hysteresis			30		mV
I_{SENSE}	Input current		-25		+25	nA
C_I	Input capacitance	$V_I = 0V \text{ to } V_{DD}$		1		pF
I_{OH}	High-level output current	$V_{\overline{RSTVDD}}, \overline{RSTSENSE} = 6.5V$			300	nA

(1) The lowest supply voltage at which \overline{RSTVDD} ($V_{\overline{RSTVDD}}(\text{max}) = 0.2V, I_{OL} = 30\mu A$) becomes active. $t_r, V_{DD} \geq 15\mu s/V$.

(2) To ensure best stability of the threshold voltage, a bypass capacitor (ceramic, 0.1 μF) should be placed near the V_{DD} pin.

TIMING REQUIREMENTS

At $T_A = -40^\circ C$ to $+85^\circ C$, $R_L = 1M\Omega$, and $C_L = 50pF$, unless otherwise noted.

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
t_W	Pulse width	$V_{IH} = 1.05V_{IT}, V_{IL} = 0.95V_{IT}$	10			μs

SWITCHING CHARACTERISTICS

At $T_A = -40^\circ C$ to $+85^\circ C$, $R_L = 1M\Omega$, and $C_L = 50pF$, unless otherwise noted.

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
t_{PHL}	Propagation delay time, high-to-low-level output	V_{DD} to \overline{RSTVDD}	$V_{IH} = 1.05V_{IT}, V_{IL} = 0.95V_{IT}$	20		μs
		SENSE to $\overline{RSTSENSE}$				

FUNCTIONAL BLOCK DIAGRAM

Table 1. PIN DESCRIPTIONS

NAME	PIN NO.	I/O	DESCRIPTION
$\overline{\text{RSTSENSE}}$	1	O	$\overline{\text{RSTSENSE}}$ is an open-drain output that is driven to a low-impedance state when the SENSE input is lower than the threshold voltage $V_{\text{SENSE IT-}}$. $\overline{\text{RSTSENSE}}$ will remain low until SENSE is above $V_{\text{SENSE IT+}}$. A pull-up resistor from 10k Ω to 1M Ω should be used on this pin, and allows the reset pin to attain voltages higher than V_{DD} .
GND	2	I	Ground
$\overline{\text{RSTVDD}}$	3	O	$\overline{\text{RSTVDD}}$ is an open-drain output that is driven to a low-impedance state when the V_{DD} input is lower than the threshold voltage $V_{\text{DD IT-}}$. $\overline{\text{RSTVDD}}$ will remain low until V_{DD} is above $V_{\text{DD IT+}}$. A pull-up resistor from 10k Ω to 1M Ω should be used on this pin, and allows the reset pin to attain voltages higher than V_{DD} .
V_{DD}	4	I	Supply voltage for the device and sense input for fixed-threshold $\overline{\text{RSTVDD}}$ outputs. A 0.1 μF ceramic capacitor should be placed close to this pin for best V_{IT} stability.
SENSE	5	I	Sense input for the adjustable-threshold $\overline{\text{RSTSENSE}}$ outputs. A resistor divider from the sense voltage can be attached to this pin to set the thresholds to the desired voltages. A 0.1 μF ceramic capacitor should be placed close to this pin for best V_{IT} stability.

TIMING DIAGRAM

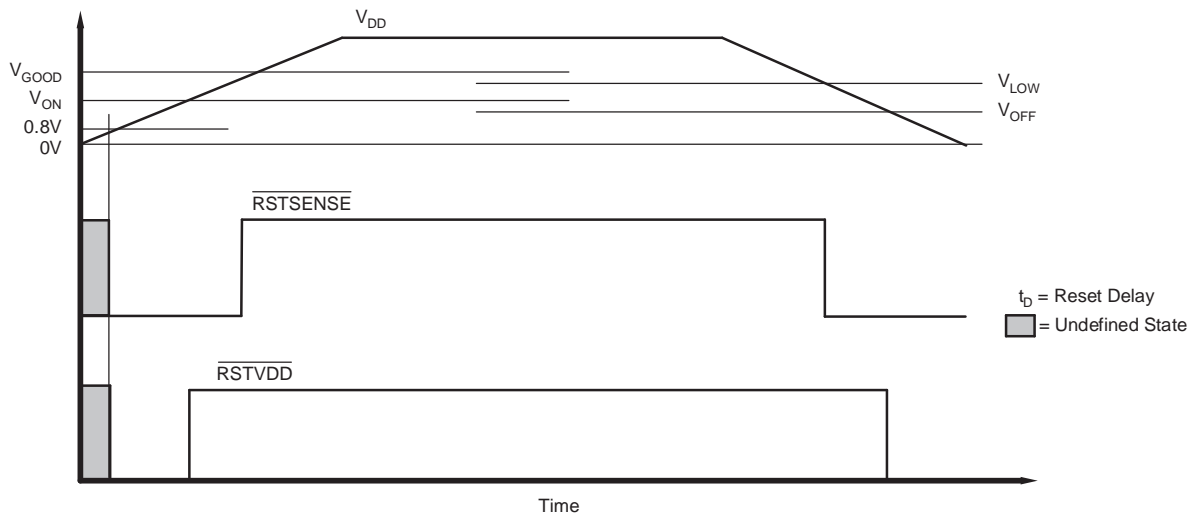

Figure 1. TPS3807 Timing Diagram Showing Reset Timing (SENSE resistor divider set to 3.6V)

TYPICAL CHARACTERISTICS

At $T_A = +25^\circ\text{C}$, $V_{DD} = 3.3\text{V}$, $R_{LRESET} = 1\text{M}\Omega$, and $C_{LRESET} = 50\text{pF}$, unless otherwise noted.

PACKAGING INFORMATION

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead/Ball Finish (6)	MSL Peak Temp (3)	Op Temp (°C)	Device Marking (4/5)	Samples
TPS3807A30DCKR	ACTIVE	SC70	DCK	5	3000	Green (RoHS & no Sb/Br)	CU NIPDAUAG	Level-1-260C-UNLIM	-40 to 85	BOM	Samples
TPS3807A30DCKT	ACTIVE	SC70	DCK	5	250	Green (RoHS & no Sb/Br)	CU NIPDAUAG	Level-1-260C-UNLIM	-40 to 85	BOM	Samples

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSELETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

- NOTES:
- A. All linear dimensions are in millimeters.
 - B. This drawing is subject to change without notice.
 - C. Body dimensions do not include mold flash or protrusion. Mold flash and protrusion shall not exceed 0.15 per side.
 - D. Falls within JEDEC MO-203 variation AA.

DCK (R-PDSO-G5)

PLASTIC SMALL OUTLINE

- NOTES:
- All linear dimensions are in millimeters.
 - This drawing is subject to change without notice.
 - Customers should place a note on the circuit board fabrication drawing not to alter the center solder mask defined pad.
 - Publication IPC-7351 is recommended for alternate designs.
 - Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Example stencil design based on a 50% volumetric metal load solder paste. Refer to IPC-7525 for other stencil recommendations.

IMPORTANT NOTICE

Texas Instruments Incorporated (TI) reserves the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete.

TI's published terms of sale for semiconductor products (<http://www.ti.com/sc/docs/stdterms.htm>) apply to the sale of packaged integrated circuit products that TI has qualified and released to market. Additional terms may apply to the use or sale of other types of TI products and services.

Reproduction of significant portions of TI information in TI data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such reproduced documentation. Information of third parties may be subject to additional restrictions. Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyers and others who are developing systems that incorporate TI products (collectively, "Designers") understand and agree that Designers remain responsible for using their independent analysis, evaluation and judgment in designing their applications and that Designers have full and exclusive responsibility to assure the safety of Designers' applications and compliance of their applications (and of all TI products used in or for Designers' applications) with all applicable regulations, laws and other applicable requirements. Designer represents that, with respect to their applications, Designer has all the necessary expertise to create and implement safeguards that (1) anticipate dangerous consequences of failures, (2) monitor failures and their consequences, and (3) lessen the likelihood of failures that might cause harm and take appropriate actions. Designer agrees that prior to using or distributing any applications that include TI products, Designer will thoroughly test such applications and the functionality of such TI products as used in such applications.

TI's provision of technical, application or other design advice, quality characterization, reliability data or other services or information, including, but not limited to, reference designs and materials relating to evaluation modules, (collectively, "TI Resources") are intended to assist designers who are developing applications that incorporate TI products; by downloading, accessing or using TI Resources in any way, Designer (individually or, if Designer is acting on behalf of a company, Designer's company) agrees to use any particular TI Resource solely for this purpose and subject to the terms of this Notice.

TI's provision of TI Resources does not expand or otherwise alter TI's applicable published warranties or warranty disclaimers for TI products, and no additional obligations or liabilities arise from TI providing such TI Resources. TI reserves the right to make corrections, enhancements, improvements and other changes to its TI Resources. TI has not conducted any testing other than that specifically described in the published documentation for a particular TI Resource.

Designer is authorized to use, copy and modify any individual TI Resource only in connection with the development of applications that include the TI product(s) identified in such TI Resource. NO OTHER LICENSE, EXPRESS OR IMPLIED, BY ESTOPPEL OR OTHERWISE TO ANY OTHER TI INTELLECTUAL PROPERTY RIGHT, AND NO LICENSE TO ANY TECHNOLOGY OR INTELLECTUAL PROPERTY RIGHT OF TI OR ANY THIRD PARTY IS GRANTED HEREIN, including but not limited to any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information regarding or referencing third-party products or services does not constitute a license to use such products or services, or a warranty or endorsement thereof. Use of TI Resources may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

TI RESOURCES ARE PROVIDED "AS IS" AND WITH ALL FAULTS. TI DISCLAIMS ALL OTHER WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, REGARDING RESOURCES OR USE THEREOF, INCLUDING BUT NOT LIMITED TO ACCURACY OR COMPLETENESS, TITLE, ANY EPIDEMIC FAILURE WARRANTY AND ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT OF ANY THIRD PARTY INTELLECTUAL PROPERTY RIGHTS. TI SHALL NOT BE LIABLE FOR AND SHALL NOT DEFEND OR INDEMNIFY DESIGNER AGAINST ANY CLAIM, INCLUDING BUT NOT LIMITED TO ANY INFRINGEMENT CLAIM THAT RELATES TO OR IS BASED ON ANY COMBINATION OF PRODUCTS EVEN IF DESCRIBED IN TI RESOURCES OR OTHERWISE. IN NO EVENT SHALL TI BE LIABLE FOR ANY ACTUAL, DIRECT, SPECIAL, COLLATERAL, INDIRECT, PUNITIVE, INCIDENTAL, CONSEQUENTIAL OR EXEMPLARY DAMAGES IN CONNECTION WITH OR ARISING OUT OF TI RESOURCES OR USE THEREOF, AND REGARDLESS OF WHETHER TI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Unless TI has explicitly designated an individual product as meeting the requirements of a particular industry standard (e.g., ISO/TS 16949 and ISO 26262), TI is not responsible for any failure to meet such industry standard requirements.

Where TI specifically promotes products as facilitating functional safety or as compliant with industry functional safety standards, such products are intended to help enable customers to design and create their own applications that meet applicable functional safety standards and requirements. Using products in an application does not by itself establish any safety features in the application. Designers must ensure compliance with safety-related requirements and standards applicable to their applications. Designer may not use any TI products in life-critical medical equipment unless authorized officers of the parties have executed a special contract specifically governing such use. Life-critical medical equipment is medical equipment where failure of such equipment would cause serious bodily injury or death (e.g., life support, pacemakers, defibrillators, heart pumps, neurostimulators, and implantables). Such equipment includes, without limitation, all medical devices identified by the U.S. Food and Drug Administration as Class III devices and equivalent classifications outside the U.S.

TI may expressly designate certain products as completing a particular qualification (e.g., Q100, Military Grade, or Enhanced Product). Designers agree that it has the necessary expertise to select the product with the appropriate qualification designation for their applications and that proper product selection is at Designers' own risk. Designers are solely responsible for compliance with all legal and regulatory requirements in connection with such selection.

Designer will fully indemnify TI and its representatives against any damages, costs, losses, and/or liabilities arising out of Designer's non-compliance with the terms and provisions of this Notice.
