Product Description

The TQM7M5012 is a ultra-small (5x5mm), GSM/EDGE Polar PAM for handset applications. This module has been optimized for excellent EDGE efficiency, Rx band noise performance, ACPR and EVM in an open loop polar modulation environment at EDGE class E2+ operation while maintaining high GSM/GPRS efficiency.

High reliability is assured by utilizing TriQuint's 3rd generation InGaP HBT technology and by TriQuint's proven module design techniques. The low profile, ultra-small package is enabled via TriQuint's CuFlip™ technology.
