DESCRIPTION

The TRS-7250-CXX0G series single mode transceivers is low power, high performance CWDM modules for bi-directional serial optical data communications such as Gigabit Ethernet and Fibre Channel. There are eighteen center wavelengths available from 1270 nm to 1610 nm, each step 20 nm. A guaranteed minimum optical link budget of 19 dB is offered. The transmitter section uses a multiple quantum well DFB laser and is a class 1 laser compliant according to International Safety Standard IEC 60825. The receiver section uses an integrated InGaAs detector preamplifier (IDP) mounted in an optical header and a limiting post-amplifier IC. A PECL logic interface simplifies interface to external circuitry.

APPLICATIONS

- | Gigabit Ethernet Links
- | SONET/SDH Equipment Interconnect
- | Fibre Channel Links
- | CWDM

LASER SAFETY

This single mode transceiver is a Class 1 laser product. It complies with IEC 60825 and FDA 21 CFR 1040.10 and 1040.11. The transceiver must be operated within the specified temperature and voltage limits. The optical ports of the module shall be terminated with an optical connector or with a dust plug.

RECOMMENDED CIRCUIT SCHEMATIC

For TTL SD Level $R1=R2=N.C.$, $R3=R5=82R$, $R4=R6=130R$

For PECL SD Level $R1=R3=R5=82R$, $R2=R4=R6=130R$

The split-load terminations for ECL signals need to be located at the input of devices receiving those ECL signals. The power supply filtering is required for good EMI performance. Use short tracks from the inductor L1/L2 to the module Rx Vcc and Tx Vcc. A GND plane under the module is required for good EMI and sensitivity performance.
