

TS7900 Series

3-Terminal Fixed Negative Voltage Regulator

TO-220

ITO-220

Pin Definition:

1. Ground
2. Input (tab)
3. Output

General Description

The TS7900 series of fixed output negative voltage regulators are intended as complements to the popular TS7800 series device. These negative regulators are available in the same seven-voltage options as the TS7900 devices. In addition, one extra voltage option commonly employed in MECL systems is also available in the negative TS7900 Series. Available in fixed output voltage options from -5.0 to -24 volts, these regulators employ current limiting, thermal shutdown, and safe-area compensation--making them remarkably rugged under most operating conditions. With adequate heat sinking they can deliver output currents in excess of 1 ampere.

Features

- Output Voltage: -5 & -12V
- Output current up to 1A
- No external components required
- Internal thermal overload protection
- Internal short-circuit current limiting
- Output transistor safe-area compensation
- Output voltage offered in 4% tolerance

Ordering Information

Part No.	Package	Packing
TS79xxCZ C0	TO-220	50pcs / Tube
TS79xxCZ C0G	TO-220	50pcs / Tube
TS79xxCI C0	ITO-220	50pcs / Tube
TS79xxCI C0G	ITO-220	50pcs / Tube

Note: Where **xx** denote voltage option

05 = -5V, **12** = -12V

"G" denote for Green Product Halogen Free

Standard Application Circuit

A common ground is required between the input and the output voltages. The input voltage must remain typically 2.0V above the output voltage even during the low point on the Input ripple voltage.

XX = these two digits of the type number indicate voltage.

* = Cin is required if regulator is located an appreciable distance from power supply filter.

** = Co is not needed for stability; however, it does improve transient response.

Absolute Maximum Rating (Ta = 25°C unless otherwise noted)

Parameter		Symbol	Limit	Unit
Input Voltage		V _{IN}	-35	V
Power Dissipation		P _D	Internal Limited	W
Operating Junction Temperature Range		T _{JOPR}	0 ~ +125	°C
Junction Temperature		T _J	+150	°C
Storage Temperature Range		T _{STG}	-65~+150	°C
Thermal Resistance - Junction to Case	TO-220	Rθ _{JC}	3	°C/W
	ITO-220		5	
Thermal Resistance - Junction to Ambient	TO-220	Rθ _{JA}	50	°C/W
	ITO-220		60	

Note: * Follow the derating curve

- Pulse testing techniques are used to maintain the junction temperature as close to the ambient temperature as possible, and thermal effects must be taken into account separately.
- This specification applies only for DC power dissipation permitted by absolute maximum ratings.
