ESD SUPPRESSOR	ULCE0505C015FR	2

## 1. SCOPE

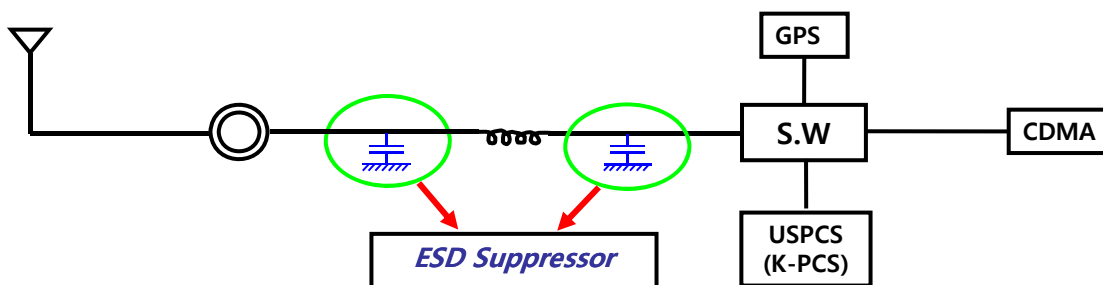

- ◆ This specification applies to chip (named ESD Suppressor) for use in RF electronic equipment. It can be possible to change the specification under document agreement between design engineers of each party.

## 2. FEATURES

- ◆ The ICT ESD Suppressor provide excellent application reliability as a result of their fine ceramic process and terminal electrodes with Sn electro plating (Pb free).
- ◆ Very fast response time to ESD impulse which is included in RF signal due to very low capacitance ( < 0.5pF ) and low ESL (Equivalent Series Inductance)

## 3. APPLICATION

- ◆ Antenna port
- ◆ USB port
- ◆ High speed data transmission line

### - Switch in Antenna

### - USB 2.0
