UPS5100

5 A High Voltage Schottky Barrier Rectifier

DESCRIPTION

In Microsemi's new Powermite3® SMT package, these high efficiency ultrafast rectifiers offer the power handing capabilities previously found only in much larger packages. They are ideal for SMD applications that operate at high frequencies.

In addition to its size advantages, Powermite3® package features include a full metallic bottom that eliminates the possibility of solder flux entrapment during assembly, and a unique locking tab acts as an integral heat sink. Its innovative design makes this device ideal for use with automatic insertion equipment.

IMPORTANT: For the most current data, consult *MICROSEMI*'s website: **http://www.microsemi.com**

KEY FEATURES

- High power surface mount package.
- Guard Ring die construction for transient protection.
- Silicon Schottky rectifiers no reverse voltage recovery.
- Internal heat sink locking tabs
- Low forward voltage.
- Full metallic bottom eliminates flux entrapment
- Compatible with automatic insertion equipment
- Low profile-maximum height of 1mm supplied in 16 mm tape reel- 5000 units/ 13" reel.

APPLICATIONS/BENEFITS

- Switching and Regulating Power Supplies.
- Charge Pump Circuits.
- Reduces reverse recovery loss due to low I_{RM}.
- Small foot print
  190 X 300 mils
  1:1 Actual size
