#### Description

The 1005 Series is a medium-gain, thinfilm bipolar RF amplifier using resistive feedback and active bias for stability over temperature and bias variations. Inductive networks maintain good VSWR while the RF is coupled through input and output blocking capacitors. The 1005 Series amplifiers are available in three packages: the surface mount hermetic PP-38 (.375 in. x .375 in.) case, the TO-8 hermetic case and the connectorized TC-1A case.
