INDUCTORS

⊗TDK

Inductors for power circuits Wound metal VLS-HBU series

VLS252010HBU type

FEATURES

O Magnetic shield type wound inductor for power circuits using a metallic magnetic material.

O Larger current was achieved by the metallic magnetic material.

O High withstand voltage(40V) was achieved by insulating technology of metallic materials.

○ Operating temperature range: -40 to +105°C (including self-temperature rise)

APPLICATION

OLCD LED Backlight, LCD Panel, OLED Panel, LCD Driver

O Application guides: Smart phones/tablets

* Rated current: smaller value of either lsat or Itemp.

Isat: When based on the inductance change rate (30% below the initial L value)

Itemp: When based on the temperature increase (temperature increase of 40°C by self heating)

REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using this products.

A REM	INDERS			
 The storage period is less than 12 months. Be sure to follow the stores). 				
If the storage period elapses, the soldering of the terminal electrodes may deteriorate.				
○ Do not use or store in locations where there are conditions such as gas corrosion (salt, acid, alkali, etc.).				
 Before soldering, be sure to preheat components. The preheating temperature should be set so that the temperature does not exceed 150°C. 	e difference between the solder temperature and chip temperature			
 Soldering corrections after mounting should be within the range of If overheated, a short circuit, performance deterioration, or lifespan 				
O When embedding a printed circuit board where a chip is mounted the overall distortion of the printed circuit board and partial distortion				
 Self heating (temperature increase) occurs when the power is tur design. 	rned ON, so the tolerance should be sufficient for the set thermal			
 Carefully lay out the coil for the circuit board design of the non-mag A malfunction may occur due to magnetic interference. 	netic shield type.			
OUse a wrist band to discharge static electricity in your body through	the grounding wire.			
O Do not expose the products to magnets or magnetic fields.				
O Do not use for a purpose outside of the contents regulated in the de	elivery specifications.
