#### 11. Caution

NO	ltem	Specification
13-1	Operating Range	-When using on the operating condition different from a standard, a problem can be generated to the performance and the life of a product.
13–2	Storage	- Avoid from placing motor for long term of six months under environmental condition of high temperature or extreme humidity, or motor may be deteriorated.
13–3	Motor Handling	To handle the motor, hold the case softly.  .  Do not bring a magnetized object or attracted object by the magnet of motor, or such object may deteriorate a performance of motor.  Input short to the motor due to mis-operating, Drive IC of the motor inside can be damaged. To avoid this problem, please add capacitor of 2uF or more between the power lines in parallel with the motor.  . Supplying voltage more than DC 4.5V can damage the driver IC
