11. Caution

| No. | Item | Specification |
|------|--------------------|--|
| 11-1 | Operating Range | - When using on the operating condition different from a standard, a problem can be generated to the performance and the life of a product. |
| 11-2 | Storage | - Temperature 5~30°C, Humidity 60% Max. |
| 11-3 | Motor Handling | To handle the motor, hold the case softly. Do not bring a magnetized object or attracted object by the magnet of motor, or such object may deteriorate a performance of motor. |
| | | - At the time of power input short to the motor due to mis-operating, Drive IC of the motor inside can be damaged. To avoid this problem, please add capacitor of 2uF or more between the power line in parallel with the motor. |
| | | - Supplying voltage more than DC4.5V can make IC out of function. |
