General Description

The XL9505 is a 200KHz fixed frequency PWM synchronous buck LED constant current driver, capable of driving a 5A load with high efficiency, low ripple and excellent line and load regulation. XL9505 supports wide input operating voltage range of 5V ~ 45V and a maximum duty cycle of 100% output. A built-in loop compensation module reduces components in the system, lowering power system cost and reducing printed circuit board space.

The XL9505 has built-in thermal shutdown, current limit protection and so on.

Applications

- Buck constant current driver
- LED backlight driver
- General purpose LED lighting

Table 1 Pin Description

Pin Number	Pin Name	Description
1	GND	Ground Pin.
2	CS	Output constant current sense Pin (CS). The CS reference voltage is 0.23V.
3	SW	Power Switch Output Pin (SW). Output is the switch node that supplies power to the output.
4	VC	Internal Voltage Regulator Bypass Capacity. In typical system application, The VC pin connect a 1uF capacitor to VIN.
5	VIN	Supply Voltage Input Pin. XL9505 operates from 5V to 45V DC voltage. Bypass Vin to GND with a suitably large capacitor to eliminate noise on the input.
